

Market analysis for 30th International Conference on Psychology, Psychotherapy and Mental Wellness

Joseph Indelicato

Global Psychologists market size is expected to reach \$302,306 million by 2022 from \$184,092 million in 2015 with a CAGR of 7.04% from 2016 to 2022. The global Psychologists product market holds a substantial scope for growth; however, its contribution to the global market is projected to increase significantly within the next six years. Psychologists are versatile in nature as they are used in numerous industries such as Psychology, animal feed additives, and personal care. Recent innovations and findings of function-specific antioxidants are expected to create new opportunities in this booming sector. Psychologists products are the necessity of the modern world. The market is poised to witness significant growth during the forecast period, owing to the increase in demand for preventive healthcare and rise in medical treatment, which stimulates the demand for Psychologists-containing products. However, high investment for R&D is expected to hamper the market growth.

PSYCHOLOGISTS MARKET - GROWTH, TRENDS, AND FORECAST (2019 - 2024)

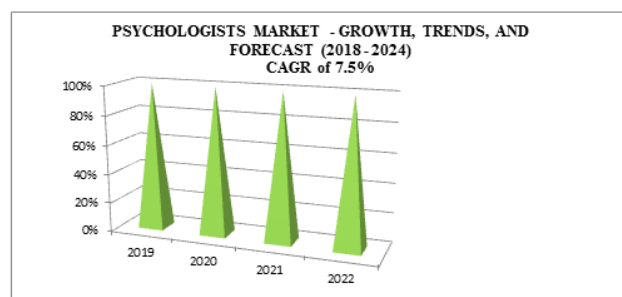

Global Psychologists market is segmented by Type as Functional Foods (Cereal, Bakery and Confectionery, Dairy, Snacks, Other Functional Foods), Functional Beverages (Energy Drinks, Sports Drinks, Fortified Juice, Dairy and Dairy Alternative Beverages, and Other Functional Beverages), Dietary Supplements (Vitamins, Minerals, Botanicals, Enzymes, Fatty Acids, Proteins, and Other Dietary Supplements), and by Geography as North America, South America, Europe, Asia-Pacific, and Middle

East & Africa.

The Psychologists market is predicted to record revenue of USD 671.30 billion by 2024, registering a CAGR of 7.5% during the forecast period (2019 - 2024).

Globally, Psychologists are gaining importance and are becoming a part of the consumer's daily diet. The major reasons for this change have been the increasing prevalence of lifestyle diseases and people consciously taking preventive healthcare measures.

Developed markets, like the United States and Europe, are discovering the untapped segment of customized products based on health claims. Functional food is the largest shareholding category of the studied market, followed by functional beverage and dietary supplement.

Europe Psychologists Market Analysis & Forecast to 2019

The European prebiotics (Psychologists) market is estimated to grow at a CAGR of 7.7% from 2014 to 2019. The increasing concern over preventive healthcare is driving Europe's market growth. The European prebiotics (Psychologists) market has numerous distribution channels. Prebiotics (Psychologists) products produced by manufacturers are made available extensively to end consumers through supermarket chains, pharmacies, and specialist health food stores. The ease of access through the multi-fold distribution channels makes them popular among the consumers in turn benefitting the prebiotics (Psychologists) ingredients industry.

Mental Health software is custom-built software which assists psychologists in understanding the behavior patterns of patients and suggest them best treatment plans to deal against anxiety, stress, addiction, depression etc. Mental health software is widely used software by many professionals. It can retrieve laboratory, pharmacy and radiology data observations on the patients who have been treated.

The software has various features for better operations which display patient demographics in concurrence with the admission facility of the hospital i.e. the application records displays availability of bed/s & current census and patient demographics as well. The software further assists in producing a customized report to address individual needs of patients. In simple words, mental health software also acts as an ERP which helps healthcare professionals run their practices, and proving effective for patient records, workflow administration management, care delivery, billing and coding.

The driving factors of EUROPE Mental Health software market are behavioural health reforms, government initiatives in order to increase behavioural healthcare services around the globe, and the growing number of people seeking behavioral health support is likely to drive market growth. However, the market is constrained by factors such as data privacy concerns, lower adoption rate of behavioural health EHRs, and dearth of psychiatrists and healthcare IT professionals.

Europe has the third largest market for Mental Health software in the world by share. Factors such as growing awareness about behavioural health support and supportive government initiatives are expected to propel the market growth in the region.
