

Mass Spectrometry Congress 2020

Purushottam Chakraborty

Saha Institute of Nuclear Physics, Kolkata, E-mail: purushottam.chakraborty@gmail.com

9th International Conference on

Mass Spectrometry and Chromatography

[Mass Spectrometry 2020](#) provides an opportunity for all stakeholders working in this field to showcase their achievements. It provides the opportunity not only to principal investigator but also the young researcher and the upcoming researchers specially co-authors who are under the study of the environment changes and updating themselves towards Global issues. Therefore, Mass Spectrometry 2020 expected to attract renowned speakers along with the coauthors, principal investigators, experts and researchers from both academia and health care industry to join together. Mass Spectrometry 2020 this year targets on the coauthors that are recognize at the beginning of each communication as many conference program forgets to provide the identity to them.

MARKET ANALYSIS

Mass Spectrometry Congress 2020 welcomes all attendees, presenters, and exhibitors from all over the world to Barcelona, Spain. We are delighted to invite you all to attend and register for the "[9th International Conference on Mass Spectroscopy and Chromatography](#)" which is going to be held during May 25-26 2020 in Barcelona, Spain.

The organizing committee is moving on to an exciting and informative conference program including plenary lectures, symposia, workshops on a variety of topics, poster presentations and various programs for participants from all over the world. We invite you to join us at the Mass Spectrometry Congress 2020, where you will be glad to have a meaningful experience with scholars from around the world. All members of the Mass Spectrometry Congress 2020 organizing committee look forward to meeting you in Barcelona, Spain.

Based on application, the market is segmented into pharmaceuticals, biotechnology, industrial chemistry, environmental testing, food & beverage testing, and

others. In 2015, the pharmaceuticals segment is expected to account for the major share of the mass spectrometry market. On the basis of region, the market is divided into North America, Europe, Asia-Pacific, and the Rest of the World (RoW). In 2015, North America is expected to account for the largest share of the mass spectrometry market, followed by Europe and Asia-Pacific. However, the Asia-Pacific market is slated to grow at the highest CAGR during the forecast period and serve as a revenue pocket for companies offering mass spectrometry equipment.

Some major players in the global spectrometry market include Agilent Technologies (U.S.), Danaher Corporation (U.S.), PerkinElmer (U.S.), Thermo Fisher Scientific (U.S.), Bruker Corporation (U.S), Waters Corporation (U.S), Shimadzu Corporation (Japan), Leco Corporation (U.S.), Dani Instruments S.P.A. (Italy), and Kore Technologies, Ltd. (U.K.).

The mass spectrometry community is probably the largest group of scientists working around a single tool. Mass spectrometry (MS) is arguably the most important analytical spectroscopic tool of modern times. There is no single area of experimental science where mass spectroscopy is not being used. There is no university or research institution in the developed world without a mass spectrometer.

CONFERENCE HIGHLIGHTS

- ✓ Application Of Mass Spectrometry
- ✓ New Approaches In Mass Spectrometry
- ✓ Recent Advances In Mass Spectrometry
- ✓ Mass Spectrometry Imaging
- ✓ Fundamentals Of Mass Spectrometry
- ✓ Ionization Techniques
- ✓ Mass Spectrometry Configurations and Sample preparation Techniques
- ✓ Chromatography and High Performance Liquid Chromatography (HPLC)
- ✓ Maintenanc,Troubleshooting, Data Analysis and Experimentation in mass spectrometry
- ✓ Mass Spectrometry in Proteome Research

- ✓ Proteomics from Discovery to Function and its applications
- ✓ Application Of Chromatography
- ✓ Mobile phases in HPLC
- ✓ RT and RRT in HPLC
- ✓ Resolution in HPLC
- ✓ Principles of chromatography
- ✓ Principle Of Mass Spectrometry
- ✓ Components Of Mass Spectrometry
- ✓ Tandem Mass Spectroscopy
- ✓ Spectrometry
- ✓ Spectroscopy Tools In Nanotechnology
- ✓ Crystallography
- ✓ Clinical Chemistry And Laboratory Techniques
- ✓ Analytical Chemistry
- ✓ Mass Spectrometry Of Polymers

Why to attend???

1. To learn about key issues in the industry (and your area of interest in particular) as articulated by practitioners.
2. To meet people and organizations addressing these same key issues.
3. To meet people with whom you've established a relationship on social media.
4. To initiate relationships with others that you can continue by social media and/or meetings in person.
5. To learn about job, internship, project and other work-based possibilities.
6. To learn about fellowship and grant opportunities relevant to your area(s) of interest.
7. To gain insight into the experiences of others who face challenges similar to yours.
8. To learn about publications and other resources relevant to your area(s) of interest.

Why Barcelona, Spain?

Barcelona, the capital of Catalonia, is a Mediterranean and cosmopolitan city with Roman remains, medieval quarters and the most beautiful examples of 20th century Modernism and avant-garde. It is no surprise that

emblematic constructions by the Catalan architects Antoni Gaudí and Lluís Domènech i Montaner have been declared World Heritage Sites by UNESCO.

The city's origins are Roman, and its long history and economic dynamism have made Barcelona a cultural city, which can be seen in the historic-artistic heritage and the promotion of the most innovative artistic trends. A wide cultural programme will take visitors to museums, exhibitions, open-air sculptures... and many concerts, plays and dances.

Popular culture also has its manifestations in this city, which still conserves its most cherished traditions, like the fiestas of La Mercè or the festivities in the neighbourhoods of Gràcia, Sants and Poblenou. These are all exceptional opportunities for getting to know the city's more festive side.

Tradition and modernity can also be seen in its innovative and imaginative gastronomy, based on fresh garden produce, fresh fish, a wide variety of sausages and olive oil. Traditional handmade cakes and pastries and sparkling wines are some of the other highlights in this brief overview of Barcelona's gastronomic culture.

Strolling around the streets of Barcelona will bring surprises at every turn. Pedestrian streets in the old quarter, green spaces, and a splendid seafront with a range of modern facilities are a reflection of its multi-faceted character. Barcelona has cleverly succeeded in embracing its past without forgetting its commitment to the future. The city is endowed with some exceptional infrastructures which are in demand as venues for seminars, symposia and international events. Its exceptional transport connections, the Mediterranean climate and the multitude of attractions for visitors make Barcelona one of the world's leading business cities. Business parks and exhibition and conference centres host a wide range of initiatives.

Visitors coming to Barcelona for pleasure or on business can also enjoy the city's Mediterranean character, which can so clearly be seen on the Barcelona coast. The city also has lovely urban beaches, marine resorts, and golf courses on the seashore. Nature lovers will not have to go far to explore the mountains in the Cordillera Litoral range and the Catalan Pyrenees.
