

Past Conference Editorial of Surgery & Anesthesia 2020

5th International Conference on Surgery was organized in **Rome, Italy** during **09-10 of March, 2020**. The event was a Surgical and Anesthesia blend with Doctors from various parts of World under one roof. The event had Keynotes Speakers with posters.

We are glad that our OCM's could manage the event and make it a success as always.

Every year Surgery & Anaesthesia invites people from all across our community to come up on stage to share their insights and experience. Whether you have worked on this field for decades or you've just started, we want to hear from you.

Wide range of topics has been listed by the Organizing committee from various departments of Surgery for doctors to choose their respective field to present at the event.

Our goal is to give Surgeons and Anesthesiologists a chance to connect and learn from each other.

For more details on the Conference visit: [SurgeryConferences](#)

[Surgery](#) is actually a surgical specialty performed by General Surgeons for a wide range of common disorders. Every individual practicing surgery has to begin with General procedure of performing surgeries. Many of them then move on with practicing in various fields of surgery depending on their choice of stream and area of interest to perform surgery on different parts of the Human body. [Anesthesia](#) is a medical procedure followed to induce immobility in human body or retract from any involuntary and voluntary actions produced, during a [surgical procedure](#) which can be painful to an extent that cannot be tolerated by human body. Various medications are delivered to a patient in order to retain his state of paralysis with lowered pain and no reflexes of the [Autonomic Nervous system](#). The ideal permutation of medication is given to any patient and procedure is typically selected by an anesthetist, or another source such as an operating division practitioner, [anesthetisa practitioner](#), physician assistant or nurse anesthetist (depending on local practice), in consultation with the patient and the [surgeon](#), dentist, or other practitioner executing the operative procedure.

OCM: Dr. Vakhtang Shoshiashvili, Anesthesia and Intensive Care Unit, Research Institute of Clinical Medicine, Tbilisi, Georgia
