

Cancer Research Webinar 2020- Past Conference Report

Meetings International organized International Webinar on Cancer Research 2020 during August 20, 2020. Cancer Research 2020 has extensive sessions in which the main Keynote presentation, YRF (student presentation), Oral, Posters, E-poster presentations. To share their valuable presentation on the most recent and advanced techniques, development and latest updates, a world-renowned speaker and prominent representative representatives from all over the world participate in the conference. On that note, Cancer Research 2020 invites all interested participants to this prestigious event.

The Theme of the Webinar is Innovations and Applications in Cancer Research .

Keywords

Scientific Sessions of Cancer 2020 includes Cancer and Tumour Immunology, Cancer Biomarkers, Trends in Cancer Research, Chemotherapy, Anti-Cancer Drug Discovery and Development

Track 1 : Trends in Cancer Research

Track 2 : Cancer Biomarkers

Track 3 : Anti-Cancer Drug Discovery and Development

Track 4 : Chemotherapy

Track 5 : Cancer and Tumour Immunology

Market Analysis :

Cancer is the second leading cause of death worldwide. It's crucial to remember that cancer is not one disease – it's more than 200 cancer diseases involved. All different, unique diseases, which require different approaches for treatment. Treatments that work for some cancers don't work for others and sometimes those treatments simply stop working. Only worldwide research will enhance our understanding of cancer and help us find and develop better, more effective treatments. And only a global search for answers will help us get to grips with this disease. . The conference will provide with an exceptional opportunity for the delegates from Universities and Institutes to interact with the world class Scientists and Industry Professionals working in the field of cancer (or) oncology.

Glance at the Market

The recent advancements in the cancer treatments & cancer care are accelerating. A cluster of innovative treatments, often combined with other new or existing medicines, and frequently associated with biomarkers, are emerging from the research and development pipeline. Over the past five years, 70 new oncology treatments have been launched and are being used to treat over 20 different tumour types. Global cancer drugs market accounted for \$78,238.9 million in 2015. The cancer drugs market is driven by the growing prevalence of various types of cancer, increasing

demand of biological and targeted drug therapies, continuous patent expiry of key cancer drugs and the rising impact of bio similars. Global Oncology/Cancer Drugs Market is expected to garner \$111.9 billion by 2020, registering a CAGR of 7.1% during the forecast period 2014 to 2020. Recent progress in biological therapies has widened the scale of therapeutic targets for treatment of cancer with the identification of tumour cell specific genes. The global cancer diagnostics market is segmented based on technology, application, and region. This report studies the global cancer diagnostics market for the forecast period of 2015 to 2020. This market is expected to reach \$13.1 Billion by 2020 from \$7.1 Billion in 2015, and is poised to grow at a CAGR of 12.9% during the forecast period.

World Cancer 2020 is comprised of many interactive scientific sessions as well as various diagnostic and therapeutic advancements in cancer. It is an initiative to unite the diverse research and business communities working in this field under a one roof to explore every single aspect of oncology.

Importance & Scope

World Cancer 2020 will be the best platform for all the oncologists, haematologists, research scholars, students who are working in this field to exchange their knowledge related to Oncology Research. This international event is an effort to understand the underlying biological procedures which are amended to increase effectiveness, precision, survivability and quality of life. According to market study, annual global growth in the oncology drug market is expected to be 7.5-10.5 percent through 2020, reaching \$150 billion. Wider utilization of new products - especially immunotherapies - will drive much of the growth, offset by reduced use of some existing treatments with inferior clinical outcomes. Payers also are expected to tighten their negotiation stance with manufacturers and adopt new payment models in an effort to drive greater value from their expenditures on these drugs. The World Cancer 2020 is the premier event that brings together International experts, Training Institutes, Manufacturing Medical Devices Companies, Business Entrepreneurs, Medical Colleges, Researchers, Academicians, Physicians, Post Docs, Students, Pharmacy Industries, Academic scientists, Industry professionals, Diagnostic laboratory professionals and decision makers across the globe to exchange their knowledge, experience and research innovations to build Cancer Research scientists to reduce the global burden of cancer. World Cancer 2020 is an extraordinary event designed for International medical health professionals and oncologists to facilitate the dissemination and application of new research findings related to Cancer. The conference invites participants from all leading universities, clinical research institutions and diagnostic companies to share their research experiences on all aspects of this rapidly expanding field and thereby, providing a showcase of the latest techniques.
