ABSTRACT

Relativism and relativity theory in social study becomes new concept as the case directly related to the recognition, protection and appreciation including building up tolerance between as well among diversity and any diverse identity having community. Not only among and between community the issue recognition, tolerance, acceptance and respect attitude building up among individuals as if merit based also taking into consideration is obliged. For the case, this study comes up with new conceptual idea building or in new way as if including the theory of relativism and relativity as well its specific perspectives as if some already developed in the same area for similar purpose as well add upping to the such perspectives that already developed by using the former in a new way of conceptual building. For the sake of the implementation of diversity democracy specially in the first and second phase of taking into consideration usually the major ideal and objective of the development of such relativism and relativity theory as well as its specific perspectives. Inconsideration of paving the lane towards positivity and positive attitude building among any diverse has entities the stated social theory with its all developed perspectives as if its essentiality is unquestionable.

INTRODUCTION

Cultural relativism is defined as the concept that states the way cultures, ways of life, styles of living, historical civilization, idea conceptualization, and all other diversity are treated in the ways once understand with others cultures, ways of life, styles of living, historical civilizations, idea conceptualization, and also others (Meseret Bekele). For the purpose of the development of the theory of relativism and relativity in the area of social study as well as its specific perspectives, cultural relativism has been used as the founding ideal with in this study. Besides, the ideal of functionalism or structural functionalism also used couple with that of cultural relativism. In other words, cultural relativism and functionalism concurrently used as a background to build justification of the ideal of the developed.

Likewise, to come up with well positivity building and to realize the socialization and development of well positive attitudinal having communities to each other including up to individual the fundamental assumption of the same theory is essentially taking into account among the objective of the lineup of such

development of the same theory. It is possibly used as an additional social theory in the area of the newly developed theory of identity couple with both cultural relativism and functionalism as the background as the latter simply state functioning the whole depend on the well-functioning of its parts as if well treating the whole parts and functions in equal manner to come up with the well-functioning and unity of the parcels in the whole.

In such a way cultural relativism in one hand and functionalism-structuralism on the other hand has been used to build both positivity as the theory in social study as well as its perspectives in all consideration based on different dimension to inclusively treat the elements that every institutions consideration taken as the diversity and diverse identity issue consideration given (Ibid).

Similarly, the above stated theory as well as its well treated and justified perspectives target to be used as a guiding principles with in diversity democracy, the political philosophy, where diversity and diverse identity of any kind should be tolerated, accepted, recognized, mutual benefit building among diverse

identity having communities as well among individual members of the same and other communities. As to such, the perspectives among the guiding principle that could manage and lead to the way positivity and positive attitude mandatory realized.

As stated above, positivism in the area of social study, building positive attitude towards diversity and diverse identity in inclusive manner that constitutes all dimensions such as social, economic, political as well as other additional aspects of diversity and heterogeneity including the indigenously practiced engagements among diverse having of any entities exist across the globe regardless any variety and geographical location consideration taken. This essentially must be taking into account as the case indispensably important in guiding the way diversity democracy could handling those diversity, diverse identity as well as other reality that indigenously exist among any known community to the way positively seen and become positive towards each other among. Any heterogeneity consideration and reconsideration is must be given account.

As the area requires some sort of theories to come up with additional information and idea justification to enhance more the area of relativity and relativism within the theoretical area of the theories in social study as if some newly developed adding up to the already exist in the considerable area with taking hold of stating specific perspectives, the study carried out with the following objectives as i) to develop the theory of positivity in social study ii) to develop several perspectives under theory of positivity iii) to give justification justify for the developed perspectives.

RESULT AND DISCUSSION

Overview on relativity theory in diversity democracy

Relativity theory in social study and diversity democracy stresses on building relative relationship on one side and area of consideration giving in a relative way for inclusive recognition delivery, protectional handling, tolerance build up, respecting and loving each other among diverse having of any kind whether the case between and among communities as well as individual members of the same and other communities. It begin with the possibility and awareness having towards claiming the right of diversity and diverse identity based recognition, safeguarding, protection, respect, toleration building among and livelihood leading in peaceful coexistent as well also the right to secure the right to gain the opportunity to promote and modernize in the way the respective diversity and diverse identity of any kind to be more advanced, modernized, advocated as such also followed by making such recognition and claim based pronouncement into effect in practical term. As such including those issues of diversity recognition and additional required elements in relation to such during implementation of nation building specially making such among administrative protocols as nominally incorporated into among elements that consideration given with in the area and ideal of good governance that largely pave the way towards holding into effect in pragmatic way to be partially or fully realized that largely target to bear inclusive benefit for all. As to such mentioning alone as political program and propaganda as if not enough but practical consideration in

pragmatic way as well caution for pronouncing in divisive way also must be taking into caution as if also banning such is obliged including in legal term. In some countries divisive based stating the advocacy of the recognition of diversity and diverse identity of any kind taking consideration as if exist in the history of the globe as among the global trends that more recognition giving stating usually might sometimes lead to split as if such also among the source conflict basically knowingly or unknowingly the regime holders and regime handling political elites taking into consideration the latter in hidden way simply to weak the potential of plurality as well as to minimize the challenge that usually comes from the demand required from such diversity and diverse having communities as well the individual members as such largely the challenge coming with extra opportunity for the whole at the national level and beyond overlooked largely by the regime holders as if such consideration must be taken into account and working for the sake of combating such become taking into account as usually stated in diversity democracy since the damage of such usually related to damaging the reality among certain group of diverse having including the stated and consideration giving identity by the whole members of the community largely also banning more usually coming up with not only damaging the identity but also extinguishing the community partially or totally as seen in the history of the globe several times as if no doubt. As this must related to the consideration and reconsideration of any diversity and diverse identity recognition and protection with any variety as if also intercommunication usually taking hold must worked up on in practical way. As to such issue of recognition is must as if also alongside with such protection and working towards the unity of diversity and diverse identity to make them leading livelihood concurrently as well in practical peaceful coexistent approach. In line with this, working not only at the global level but also working on for the sake of such recognition and protection as well as peaceful way of livelihood leading in concurrent and together way as if must put into effect as the way it reflect the global and international based way of unity, togetherness, right respect as if human and democratic, peaceful coexistent way consideration giving obliged. In normal way issue of recognition as if also protectional reflection usually making beyond the local level as if must be taking into account.

As to such, the issue of intercommunication, working in unity, togetherness stating, unity stating, interconnection and interaction among any diverse has known entity as if usually consideration given as the last objective the theory of relativity and relativism taking hold. That means the case begin with the chance to have right to claiming as followed by implementation and other additional required engagement then might be followed by realizing the ideal of togetherness and unity that usually to be reflected in the way the respective diverse having known communities including as to individual level making interconnection, intercommunicating interacting as well as together leading livelihood in respective way to each other. In other words, the same consideration also taking into account a relative interaction, interconnection, intercommunication among diversity and diverse identity having communities. As has been stated above the same consideration of interaction, interconnection, intercommunication not only limited to the

communal exist diversity and diverse identity of any kind as also consideration giving to the same way among the members of the same community and beyond to other as if also expected. As to such interaction, interconnection as well as intercommunication as if if not exist creating, building up, developing as to the way beneficiary and benefit bearing towards at least the existing communal as well as individual variety, diversity as well diverse identity of any kind usually taking into consideration is must be obliged as if while laws of any kind area enacted and to be enacted including the constitution as well as the amendment of the existed laws of any kind as well as proclamation as if also inclusion of such ideal into the way policies and strategic plans for long term and short term as if also consideration given must be obliged as to such directly in line with the way diversity and diverse identity of any kind should be relatively and positively handled. As such the work engagements taking hold and the way policies, plans and other related pragmatic action based formulation of laws as if must consideration given such ideals of diversity and diverse issue of relativity building and enhancing interaction and intercommunication as if based on the merit of mutual interest and feeding each other whether the case economic, human right, justice, communication building as well as making and enhancing a bridge for more interaction and intercommunication in more advancing level up to unification without compromising the advantage bearing elements as well as any advantage bearing as well norm-values of any active one should positively see. This simply based on the merit of the existed diversity and diverse identity of any kind that should be recognized, respected, accepted, protected from any hampering, and violation of right of any king whether the case is in the area of human right consideration as if the latter the most consideration giving area in line with the issue of democratic right as if the way economic consideration in the way justice issue taking into account also taking consideration must be attached with the area of human right and well democratic right also as if also the same consideration and reconsideration usually must be seen as inseparable based on the fundamental assumption of technological issuance of invention or innovation as well also consideration of engagement as well as holding the wealth as well equally consideration giving in the sector of the utilization of natural resources as if also among the one that relationship and more attachment building seen to be hold as the case diversity and diversity democracy taking hold the whole as mentioned here must be taking into account as the most essential right to be covered and protected as the more right issue consideration given in relation the reality belongs to the same or different communities elsewhere exist regardless of the mentioning of diversity of any kind as id the relation such reality with human right consideration and reconsideration for protection and combating the violation of such as if among the most essential elements that to be consideration given in diversity democracy usually based on the assumption of all inclusive diversity and identity theories as if the consideration of the theories usually based on the goodwill and benefit consideration among the communities elsewhere exist without the compromising of any issue and elements of right and other usually exist benefit consideration as well as potential and expected will based benefit in equal manner not only for the same community taking hold but also among other diverse

communities elsewhere exist that know each other the reality belongs to both to each other. But also issue of toleration building among the communities elsewhere exist as well as individual consideration and reconsideration of the same and other additional taking into consideration for the mentioning of the communal membership as such membership stating also might taking place according to diversity and identity theories that taking hold the reality exist among the respective or other communities.

The above consideration again based on the assumption and merit of the issue of diversity must be consideration given, diverse identity must be protected as well as issuing of the direct relation among diverse identity and human right concern as if also another additional element that must be incorporated in the area of relativism and relativism. For the sake of combating and struggling towards reality protection elsewhere exist across the globe as the case directly related to human right protection and safeguarding. The same consideration also among the area of social study of mentioning those reality exist indigenously among any known society elsewhere across the globe usually its relation with human right issue is unquestionable. This is because if any reality and any indigenously exist of any entity among any known community not to be recognized, protected including banning of such its correlation with violation of human right not only the community and its members practicing indigenously but also beyond. Banning usually leads to extinction of such banned entity of any kind including the community itself whether partially or fully. For the case the most important solution that can resolve such problems and combating the aforementioned hampering issue as if using the theory of identity of encompassing such with diversity democracy to usually more recognition giving and advancing more to the level of modernizing with time based on the newly adopt and created technological innovations and inventions including taking into consideration the issue of globalization, interconnection as well as materialism.

As has been indicated above interrelation, interconnection, intercommunication as well as advancing the existing reality of any kind should taking into place only based on the merit of humanity. As to such, the usual interrelation, interconnection, intercommunication as well as advancing and promoting more the same or other entity as interpreted here above usually followed or alongside might resulted more positive attitudinal and relative attitudinal development. In other words, more intercommunication and positive interrelation attitudinal development might followed such interaction and interconnection alongside with the implementation and consideration and reconsideration of relativity and relativism theory as humanity issue also must be recognition giving as all round reality exist among any diverse having communities including self-based identity categorization must be obliged. In such a way diversity democracy taking hold relativity issue first then followed by positivity. The latter becomes the most essential and big aim of umbrella of diversity democracy of the whole diversity having communities including all individuals exist as usually positivity building and positive attitude development among known communities. This simply or coupling with humanity issue as such issue usually possible to

make them know and unite them more each other and unity based on the merit of positive attitude having among or to each other. For the same purpose, relativity and relativism as if paving the way towards the implementation of the required accomplishments for the realization of positivity and positive attitude building that expected as if reach at its peak usually at the matured stage of the phases of the implementation of diversity democracy.

As the issue of paving the lane towards the realization of making know each other of all diversity and diverse having communities including the members of the same communities and beyond in an easiest and simplest way If all well treated in equal manner, well recognized and protected from hampering as if unquestionable as such issue minimizes as well vanish enmity either fully or partly and gone astray as well relative family based relationship building as easily realized. As such objective become the main target of relativity theory in diversity democracy. Based on such issue with in social study the concept of relativity is to somehow new while theory in consideration taken. With this regard, this study come with relative as a theory to be utilized in diversity democracy as if originated for the first time specially for the utilization of such among different perspectives that usually representing various elements and dimensions human live. In such a way relativity to be originated and to be used to advocate relative to each other any diversity, diverse identity of any kind should consideration given, recognized, protected, taking into account toleration building among diverse having communities as such mainly lead to positive development as well as positivity building among diverse having communities to each other. Among such perspectives as the recently developed Sociorelativism as cultural relativism school of thought usually consideration taken as another area school of thought in relativity based diversity recognition in equal term with considering any diversity exist in all ways. As to such also Politicorelativism to be taking into consideration the implementation and the realization Sociorelativism as if taking into account equality, justice, freedom, fair utilization of nation resources as well engagement building and right respect in economic based on individual merit as if relativity taking into consideration both individual merit base skill and other competences including perceptual issues. As to such Econorelativism equally with the latter issued as the Politicorelativism usually taking into account to inclusively consideration taken of Sociorelativism dimensions, Econorelativism as well as also diversity of any kind taking into account in inclusive way as if relativity usually consideration given all dimensions should consideration taken for the realization of equality, justice, freedom, fair utilization of national resources as well as participation in other sectors. In addition with regard, Politicorelativism inclusion of the political ideals that target to combat the hampering of the ideals of relativity theory of diversity democracy as if also the most important consideration taken as if competition in politics to handle governance for the merit of recognition and putting into function of the ideals of relativity diversity democracy as if also likely encouraged as building democracy usually requires multi party competent competition as if the usual issue multi party based on the merit of relativity building in equal manner with

any discrimination and partiality as if among the most important assumption diversity democracy.

As to such diversity democracy exclusively states that diversity and diverse identity of any kind should be considerably and relatively must be recognition given. Issue of protectional delivery also must be taking into account the relativity and relative building among neighboring and as well as beyond while based on community level as well to individual level regardless of any membership area of residence consideration while the latter is taking hold, The same consideration of variety with regard to the issue of professionalism as well proficiency and also competences area based on the merit of the ranking issue of the competences the individuals hold based on the merit of innovation and invention acts in the area of any professional area in equal manner as if taking into hold the same area with the same consideration and reconsideration as if also work engagement and successive consideration of the result that proficiency and work engagement bear as if at local or national or international level as if taking consideration the way innovation and invention of any kind to the level of international utilization as if also must be worked up on not only by the individual innovator and invention but by other concerning and stakeholders across the globe including the way such works of invention and innovation acts taking hold to the global level to bear the benefit objectively taking place by the innovator and the planner as if also taking hold in political ideal mentioning such for international concern of the same area as if also not only belongs to that of the personal professional but also to the regime holding elites including the government of the time by looking such in positive way by disattaching from any political agenda that usually consideration given that the regime holding groups seen the political arena at international level as if to create extra additional friendship or disfriending from the formerly friends as is must be out of the agenda taking into account while stating the same work related objective of the same work as if including the area of proficiency and ways the innovator doing his work using his talent, area of competences as well as other enthusiasm and energy that belongs to the same and other professional simply for the purpose reinforcing the same and other area of proficiency to come up with the new creative ideal and development by stating and identifying the existing taking hold gaps.

So therefore the area of proficiency taking into consideration including the work engagement and the result the work engagements bear as if usually taking into consideration and reconsideration must be issued as such more pronounced for the coming of other additional work continuance of engagement as well as the same or different results where the case as if modification the existing in tolerable way or additional new creative development. Issues of such if not consideration given whether as the case of social aspect, economic aspect usually systematically or officially blocking the same work engagement having professionals from having funds for the engagement and the result that followed as if also political aspect as not taking into consideration such innovation and creative development to not be recognition giving as well as acknowledgment giving as well as the same consideration taking place in usual negative and negativity taking into place as if not only resulting the

hampering and right violation of the diversity and diverse identity issue that the professional belongs including the professional themselves but hiddenly or systematically or officially damaging the proficiency on one side and the creative acts and creative development on the other that usually could must see as blocking the global communities elsewhere exist from having opportunity to gain certain advantage bearing projects as well as advantage usually taking into consideration s if making the country including at the global level as if blocking the usual dynamism process that the globe and the global citizens wishing. In such a way the global citizens elsewhere exist usually needs the dynamism process of the global situation in relative way to more advantage bearing projects and the result the same or other projects coming up with during the process of the dynamism project taking place as well as at the last while the objective of the project is partially or fully realized or achieved. In such project usually consideration giving in the same or in certain area as if also impossibly tolerated and must be consideration given in equal manner because one creative and innovation might be followed another additional projects of the same or other benefit bearing of the same or other different interrelated as the case of one innovative act become the most essential central point for the other areas innovation project designing while any creative act might usually followed by other creative as such the former of any creative kind usually serving as the guideline for the other one. In such way positivity would come up with the same area if the projects and its results usually encouraged as if among such at the national level that the creative development is taking place as if also its consideration and reconsideration at global level by the same proficiency and other usually having experience in the same or different area including the government of major power as if bearing influence for the purpose restrain taking into place on such projects of creative development as well as the utilization of such results coming up with the project stated here above. As its utilization and advantage bearing not only limited to certain area of consideration giving and beyond but usually using such projects and its finally results across the globe usually as dynamism and change oriented global communities needs extra and additional elements that might lead the globe to the sated dynamism and nominal changes as if globalization taking into consideration such as if must be handled appropriately by any concerned bodies and any stakeholders including such into educational and schooling to learn more from such work as if the way such creative works taking place including its idea and knowledge belongs to the one creative development and invention as must be shared with the global citizens based on schooling and including into educational institutions as if also among the one that leading to and causing the aforementioned dynamism towards the way the globe is reoriented whether the case of global changes as well as result of dynamism as if taking into account usually among the one that taking hold more to be the world or the globe to be dynamic and dynamism at one time never be usually dynamism for another time if creative acts and developments usually taking hold and its work engagements and projects not allowed in appropriate manner including the funding and budget planning for the same work consideration and reconsideration as if such additional creative acts and developments might come up followed intended or unintended

work engagements as if usual preparation at any time by taking concern for the advantage to be beard and bearing for the whole global citizens regardless of any diversity taking into consideration as if obliged. In such a way caution taking and concern having or developing for the usual dynamism process of the globe. The concern of adding up to such dynamism process during the globalization period as if must taking care by all professionals including the governments of the regime holding in several countries simply for the sake of own contribution of all able and capacity having including making ready the appropriate budget and fund delivery whether from national or local as well as at international level. The same must be appropriately taking place to utilize from the same aforementioned elements of intended or unintended creative acts and developments as well as its related upcoming ways of delivery to change oriented global citizens and beyond. Making such is must according to the usual ideal of relativity and relativism theory of diversity democracy as an independent social theory taking hold relative way interconnection, interaction and intercommunication building as such usually making various diversity and diverse identity having communities as well to individual members to deal with such projects and for the utilization the results of the projects for own and beyond. Specially the intellect in any area must taking into consideration given as to not only encouraging but also dealing with other diverse having groups or individuals to the its utilized, processed, educated, to be guideline to another additional works and work engagements as well as to be adopted in the same or other area of proficiency taking into consideration as well as the issue of mentioning such for the usual concern of the way leading to the expected dynamism and how its process taking place as if dealing with such usually might lead identifying the gap to be filled partially or fully to usually taking into consideration in the area of expected dynamism process. As to such all must be consideration giving and taking into account a concern to be able to come up with the ways dynamism of globe for the utilization of the global citizens to not be static and allowing such with regard to its invention process as if not only such taking into the process of implementation as if must issue by all with any distinction. In such a way issue of protection based on relative and relativity issue must consideration given without any distinction taking hold in equal manner context. In such a way context of running away from relative building of toleration building and peaceful coexistence way of leading livelihood usually as if never be tackled obstacle and must be corrected if exist. In the case running away from such also mentioning as the case must consideration given the issue of political dimension and other considerable institutions in addition to the political institution as if social ,economic as if all institutions must be relatively built way of equality issue, justice based balancing of equality if formerly hampered in practical way based on the heterogeneity, diverse identity, diversity as if all round social, political, economic, as also identity based diverse exist also must be relatively seen and consideration taken as among the elements of good governance specially during the implementation of diversity democracy.

As has been stated above any area of consideration giving and consideration meaning (lacking) in certain area of diversity and diverse identity aspect directly in line with the appropriate protectional and reinforcement delivery and lack of such in any other appropriate or inappropriate aspects. In such way consideration giving and blocking such consideration might positively or negatively affect the usual work engagement in another sectors and including the professionciety area consideration. This is because work engagement and taking into consideration the usual similar creative acts and developments in social aspects as to the way theories are developed and created usually encourage bearing directly related to the upcoming and process taking into hold the same ideal or other in other aspects such as political ideal as the gap always requires filling for the realization appropriate concern of the respect and safeguarding of the right of any kind whether the case politicoeconomic based justice as well fair utilization any appropriate elements that belongs to the country as well to the globe but lack of appropriate handling such usual innovation and creative development might results restrained not only in the same respective area taking into consideration but also in other areas. As to such theory in the same appropriately mentioned social theory area usually leads to the appropriate other additional creative acts and developments in the area of politics as a new ideal, philosophy, principle, ideological guideline as the creative acts and developments in the same or certain area becomes the guideline and paving the lane to the creative acts including the way the same or different engagements and the process it usually taking hold encouraged, taking into account the same or different institute based preparation as well as the way issues the same /similar as if also establishing continuance with interruption by handling in inappropriate way. As to such handling must be caution taking and must be free from bias and partiality as if if partiality taking account and exist blocking the same and similar engagements not only in certain or respective area taking into consideration formerly but also in very far professional area as the creative acts and developments are interrelated within the same area as if guideline and motivational taking hold for other areas as if also proficiency must be taking hold free from banning the same engagements either based on political intent and other inappropriate usual consideration targeting the make advantageous certain group of communities or individual elites as well also alienation establishments the other consideration given as alien usually by the political elites handling the usual governance of the country as if politicoeconomic empire building and holding power for long as if among the most importantly taking into hold while banning and prohibiting even sometimes legally in some countries knowingly or unknowingly in some countries. Usually intimidation and usual political harassment as if among the most importantly taking place as while right of the individual professionals of the creative developer and innovator usually violated for the same and similar consideration banning systematically or legally as if among the elements that make decline the reinforcements that usually needed from the able and capacity having professionals.

In this regard as to the mentioned politicoeconomic philosophy as if the first initial phase as if relativity consideration,

reconsideration based on the issue of respective giving, recognition, as well as lastly the objective of the first phase prominently lead to positivism and positivity building at the final stage. In such case among the included relative based perspective developed as if Sociorelativism, Politicorelativism, Econorelativism, along such also Identityrelativism included ethnicity, language as the community level and also at the individual level based talents, behavior as well as others usually possibly included.

Sociorelativism

In the area of relativism and relativity theory the first perspective that taking into consideration is Sociorelativism. In such a way a more tolerant, respectful familyhood based relativity building towards each by all diversity and diverse identity stating groups of communities in the area of social aspect. In such a way cultural elements such enculturation, acculturation, social norms as well as other dimensions in the area of sociocultural issue as if among the consideration given that taking into consideration in the area of Sociorelativism perspectives of the area of positivism and positivity theory branch of the major elements while the recognition of Sociorelativism that incorporates into the way relativism and relativity parts of consideration and reconsideration taking into account.

As to this perspective, it states that relativity and relativism development and acquiring more relatively recognition giving manner in equal way as well also developing more tolerant and respectful outlook towards any social aspect as among the identity belongs to any consideration taken community as well as among individuals also equally protected, appreciated, given merit based on merit and advantage the same category of diverse entity among any bearing. In this regard, building recognition, protection, appreciation merit based advantage building consideration giving towards any social issue is consideration taken. That means good outlook including equality, justice, human right consideration based on the reality among any regardless any issue and promoting towards such in relation to any and all heterogeneous social aspects and norms of livelihood leading as if likely consideration taken.

The need of equality consideration and reconsideration as well also the need of human right protection towards self must be issued and recognition given for its realization as if also towards others by considering ours and self-mentioning usually among the fundamental assumption of this school of thought. As other than ours and theirs as if self and ours usually the element that taking consider according to this school of thought. That is to mean self-consideration and ours consideration usually self as if among the elements of ours as the case variety still exist and consideration taken but self and ours shorten the distance of the consideration of ours and theirs or self or yours as if weaken the rigid demarked boundary while consideration taken as ours and their or yours indication that distancing the variety as more difference indication as if also demarking boundary based on rigidity and such distancing and rigid based boundary demarcation between diversity and any social instances might lead to unity destruction, weakening the strength and even its consequences towards instigating conflict among those diverse

having in social then followed by other context of distancing and lack of mutual understanding each other among as if intense likely to hampered various diverse issues and elements across the globe among diverse and diverse social norm having regardless of geographical variety elsewhere across the globe.

So therefore, according to the fundamental assumption of positivism and positivity theory recognition and protection giving based on the universality of human right, equality, justice, as well freedom for all diverse having entities usually become the most important solution for such destructive norms of rigid boundary in line with social issue as if variety and diversity in such social aspect must be consideration given as beauty of identity pluralism as if also consideration giving as best opportunity having consideration and reconsideration.

As to such, the assumption of this school of thought might not be realized overnight or with in the short period of time and might takes short or long period of time based on the conscious and awareness as well literacy issue of the mass as well as the rigidity and flexibility exist among the regime holding groups of the respective government of those countries across the globe. Level of self-consciousness also among the major factor that lead to the realization impartially or fully within the context of the level of others also as usually consideration taken. In such a way the advocators and proponents of Sociorelativism perspective are called Sociorelativists.

Politicorelativism

Alongside with this, Sociorelativism for the sake of consideration as well recognition giving and tolerance build up among the communities inclusive political aspect that targets to stress on the relative recognition, equality, justice, freedom, human right based protection delivery within the inclusive based structure built and would be built political governance usually as if issued according to Politicorelativism. For the sake of the realization of the above norm and political outlook building for all stakeholders as if Politicorelativism as if the most important ideal that stressed on. In such a way Politicorelativism inclusively and exclusively undebatable as to assure the equality and justice based recognition and protection delivery for all diverse stakeholder usually for the fully realization of human and democratic rights. In such away the way Politicorelativism issue taking hold the Sociorelativism issue usually must hold the whole diverse social elements based on the scope the regime and the regimes taking into consideration into their political governance statehood. In such a way the advocators of such including the political practitioners inclusively likely considered as politicorelativists.

Econorelativism

The other important relativism and relativity theory in the area of social study for the sake of utilization of both in the stated sector of social aspect as well as economic issue consideration taking as if also Econorelativism. Econorelativism inclusively issued the consideration and reconsideration of all modes of production, means of production including all diverse economic engagement that could not hamper any diversity as well as right

based of any kind should consideration given as to be recognized, protected, worked up to more advance to a way modernity taking into consideration. As a means and mode of production equally consideration given including those modes of production that now a day's considered as egalitarian and not be advanced. For the latter to more advance the same engagement including the way affirmative action taking hold for such for the sake of making such engagement to come up with more advantage bearing equally with the way today's those economic engagement consideration given as more advanced and more output bearing. In such case ignoring and overlooking any benefit bearing norms including that consideration given as egalitarian and indigenous based among a certain community alone as if such overlooking must considered as directly attacking the human right and the ways of those stated communities and community members leading their livelihood. This is because ignoring based on the stated criteria of egalitarianism and also on other means that might results importing the other ways of livelihood leading from other area with considering the reality among the importing communities as such case never has familiarity with the reality of the society considered as imported or among the destination community that the ways of economic engagement including un indigenously produced that doesn't has familiarity among the same people as such the importation of both the engagement and output without familiarity building, interconnecting with their ways of livelihood leading, their former modes of production and reality belongs to them in any aspect including the moral values in the area of social aspect as if awareness creation and building more literacy campaign that might take long time as also without consideration taking more reality issues among the destination community as if must be consideration given as hampering the indigenously exist economic aspect as such also directly related to violation of right both human and democratic once.

In relation to such equality and other right issue based consideration and reconsideration of any diverse economic engagement as well as modes or means of production as if the advocators of such perspective exclusively called Econorelativists.

Identityrelativism

This inclusively reconsideration and consideration issueing based on justice, equality, human right protection for all diversity and diverse identity having communities including at individual level. Identity issues include all diversity and diverse identity of all kind as if inclusively consideration taking is obliged. The proponents and advocators of the perspective area known to be identityrelativists.

Realityrelativism

This perspective state that any area of recognition, protectional delivery of diversity and diverse identity in relation the reality exist among any diverse reality having community should be taking into consideration. This is because if any reality among any diverse entity should not recognition given protecting human right is unquestionable and unthinkable. As such any right preservation and the prevalence of the rule of law, right to

live including all necessary requiring elements fulfillment as if must be related to the reality on the group otherwise issue of human and democratic respect and preservation rightly protection become under risk of vulnerability.

Ethicrelativism

Ethicrelativism is centered on the recognition of any profession and its related professional based career of any that should not only recognition but also holding respect of any kind including the respect of right for the respective professional both based for having such profession or aquering the same profession and for the benefit that profession bearing. As if also the recognition bearing of the profession, the career as well as the benefit for the professionals for what the deed and bear benefit for others by using their respective diverse professional as well as career delivery as if without distinction respect based making them or the professionals for what they deed equivalent to the category of their professions and result their profession bear based career accomplishments as if free from mischief, corruption, black naming intimidation as the latter totally criminal action taking hold must be in such a way taking into account as if must be obliged. The benefit respect and recognition delivery never in separate while the profession is recognized the professionals and the result the profession bear also must be concurrently recognition giving in a positive way equally with value neutrality as well free from partiality, ignorance of any kind as well discriminational attitude not in relation to other profession and other related or different career or career result while recognition and respect giving and taking hold as such usually result discriminatory attitude based on benefit based mischief and other inappropriate handlement but also profession alongside with its career as well the result bear of both the career and the profession itself independently as if also free from discriminatory comparison as the latter must be banned officially as if in legal terms.

Moralityrelativism

Simply concentrates on moral issue among any diverse community, spiritual entity, norm, values or moral-values, as well as ethical standard, behaving the way intra and inter community any where exist behaving, socialization or socializing as the latter directly or indirectly affect the way all members of the community behaving alongside with nature. While such issue taking consideration side effect having might be taking into consideration to be changed and modification taking into consideration with long term socialization, education other necessary awareness creation elements including training as if any participation of stakeholders including from international level as if all with the consent of the community and the community members with consultation and long term plan as if the plan also not only at national level international based recognition and legitimacy for the plan, objective related to the plan in specific way as well on the usual implementation as well the procedure taking hold in such long term eradication of the already exist reality based side effect. The case must be free from political and other sideline having agenda.

Institutionrelativism

In the area of the institution context ethnicrelativism, religiousrelativism (religionrelativism) and other elements of institution usual consideration possible for the consideration and reconsideration of the usual based respect of right of diverse having in any elements of institutions as if possible for the case of political context as well economic context as stated in the area of Politicorelativism and Econorelativism. In case of taking institutional handling taking holding if certain institution hampered in uncontrollable way as if manageable unmanageable negative impact bearing on other several institutions as if common and unquestionable. For the case of this ideal of the interconnection or the interregulation of institutions to each other as if the case might regulating all in all as if must be consideration taking. Usually separating even for the sake well institutional handlement might exist but issue of interconnection in any means as if must be consideration given.

Servicerelativism

In the case of service relativism as if service delivery of any kind must be taking into consideration based on the relativity issue of thinking for others beyond self as if value giving for any concerned body and consideration giving entity of any as if delivered in fair and justice based taking holding to realize the taking holding ideal and philosophical understanding of relativism and relativism taking holding as well as valuing and consideration and reconsideration of the ideal of diversity democracy. No rural urban consideration as if the only consideration given usually proportionality as well as distance taking into holding based on the ideal of health service delivery for all, education service delivery for all, childcare at school for all under age and beyond as if fair based utilization of the requirements plotted for the purpose of fairly taking into holding education delivery, health service delivery as well as infrastructural interconnection of various country based, town based, urban based, rural urban based as well as village rural rural based interconnection to well intercommunicate the service delivery taker and giver as the case of the latter professionalism as well as institutional establishment and expansion as if nearbyness consideration based population proportion ration of the total population per institution establishment as well as service delivery care taker professional based on the necessary requirements and rumination taking holding based on the burden and area of locality that establishment of service delivery institution taking holding as well as service in the area of infrastructural building and expansion taking into account. Fairly is fairly for all as justice in some areas as if hampered justice in certain area as the service delivery of all institutions interconnected and more interconnection based on the ideal of relativity and relativism with diversity democracy and beyond as if must be taking into embracing as if justice in the area with equity taking holding obliged and mandatory with partiality and discrimination as if among between rural-urban as commonly seen largely several times across the globe except minor areas.

Identitystainism

According to Identitystainism radicalized way advocacy and propaganda usually forbidden and should legally banned. This is because if identity is radicalized in an inappropriate way that can easily lead to chauvinism and other unmerited based results usually negative impact having consequences might usually followed. As to such in radicalized way might also hampering the interaction between different identity having and mentioning groups of communities as the case also followed by creating and building enmity. That is because if the case of radicalized way propaganda repeatedly taking place as such also make suspect and allow for politicians specially self own self stating politician elites and mischief politician create a chance to more radicalize the case to use such as a political identity theory in another diversion part such as issue of holocaust, genocide, assassination of known and charismatic intellects as well also might finally lead to forceful assimilation to other from either side as if the latter usually among the actions that consideration taken as hampering global heritage as if damaging or making extinct and disappearance of certain identity having group means totally considered as the act against humanity of the issue human right violation. Natural and human right is lost totally and partially.

SUMMARY AND CONCLUSION

As has been stated in the main body, relativism and relativity theory alongside with its specific perspectives in number about five have been developed. In such case the developed specific perspectives for the area of the aforementioned topic based

among diverse communities as if the one included in this study become the one that pave the lane towards the accomplishments and realization of the ideal and fundamental assumption that consideration given with positivity and positivism perspectives already included in other parts of study. As such case, the study fully important to mention the implementation and fully realization of diversity democracy the already newly developed politicoeconomic philosophy as if social aspect and the reality on the ground among diverse having communities to individual level as if among the elements issued in the same philosophy as if for the stated fully implementation and realization of the finally objective of diversity democracy based on the philosophical inculcation within it this final study on the area become making a gap fill that target as the philosophical input become began from relativity consideration and reconsideration and finally taking hold positivism and positivity building in all manner based on equality, justice, freedom, self rule, economic engagement based on self-reliance as if innovation and invention acts taking into consideration as if at matured stage the latter fully or possibly totally be realized.

given inclusively the new one as if identity relativism as well as Identitystainism as well the rest also adopted from the already developed school of thoughts in cultural relativism by the same author. In such case the same author developed other additional theory of Sociopositivism, Econopositivism and Politicopositivism for the realization more positive outlook
