

Pharmacist Helps in COVID time

Victor Garcia

According to Covid-19 time so many members had affected with Corona it causes symptoms like fever, cough, cold, sneezes and shorten of breathe. It affects person to person because, it is easily spread. Due to spreading the virus all countries had underwent to the lockdown.

While in lockdown also sometimes corona had affecting to so many persons and so many affected people had died also. In that criteria pharmacist helps a lot in crucial period of pandemic. While whole country at their homes pharmacists came out and prevented from Corona with different practices areas are on the front-lines offighting this pandemic.

As, pharmacist using their extensive medication who the patient affected to Covid 19 treated with antiviral and antibacterial, pharmacist helps the patient with temporary drugs due to not affect more and not to affect to the other population.

Here we can discuss about 3 different types' pharmacists Hospitalized Pharmacists:

Who had affected with virus they have hospitalized due to sickness of their health at the time pharmacists will helps a lot. Pharmacists can tie up with WHO other national health organizations and they get an information how to treat with that and they will helpful to the affected persons with Covid or related illnesses. They also help to care for patients with underlying chronic medical conditions that may make them more vulnerable to the virus, such as lung disease, cancer, heart failure, and diabetes. the medicine would have been tested in a very small number of patients for a limited period of time.

Hospitalized Pharmacists:

Who had affected with virus they have hospitalized due to sickness of their health at the time pharmacists will helps a lot. Pharmacists can tie up with WHO, other national health organizations and they get an information how to treat with that and they will helpful to the affected persons with Covid or related illnesses. They also help to care for patients with underlying chronic medical conditions that may make them more vulnerable to the virus, such as lung disease, cancer, heart failure, and diabetes

Industry Pharmacists:

Most of the industry pharmacists work various roles including drug development. Many pharmacists in pharmaceutical industries, they developing the vaccine to prevent and treat illness During Covid-19 most the industry pharmacists are Since from beginning corona, pharmacists had gave many guidelines have been published with recommendations for pharmacists as well as their responsibilities during the pandemic. However, few describe pharmacists' experiences in this novel context.

Finally, in the pandemic time or uncertain time pharmacists did their help to the population to get awareness to don't get pandemic with the virus. They giving awareness to maintain the masks every-time, sanitizing importance, in-taking drinks importance at every time. We are so, thankful for pharmacists and future pharmacists. Stay Safe- Stay Healthy- Be negative in Corona.
