

Reconstruction Surgery of Kidney in Cancer Patient

Tatiana Black* and Misti Mefugh

Department of Urology and Surgery, Dss Naval Hospital, Naples, Italy

A woman has been suffering from cancer since her early age. Her husband refused for the treatment of kidney as she was suffering from cancer and due to some financial problem too. During the treatment we found the cancer patient suffering from kidney disorder.

Presenting some original clinical images of the surgery (Figures 1-4).

Figure 1: Section cut during surgery.

Figure 2: Showing kidney portion.

Figure 3: Showing reconstruction section.

Figure 4: Failed Kidney has been removed.
