

## Research Innovations, Several Journal Exist, but New Approaches Need to Potentiate the Research

Adeeb Shehzad\*

School of Life Sciences, Kyungpook National University, South Korea

Around the turn of twentieth century, the interest of health professionals in open access has increased dramatically. Different open access journals offered the opportunity to reflect upon the current situation in the different aspects of life and to assess how it can be developed in the future. Truly, highlighting point in contrasting directions on the benefit of assessment, the scientific conversation is tell apartin the social, cultural and natural sciences and the discussions about the common fundamentals of the field are enduring through stages. The breadth of the perspective knowledge and the discussions initiated through open access encouraged us to introduce a new journal of pancreatic disorders and therapy. The journal accepts the original research and review articles, letters and commentaries that meet the general criteria of significance and scientific excellence. The journal also highlights the methodological and conceptual-theoretical developments in the pancreatic disorders therapy and management. On behalf of journal of pancreatic disorders and therapy, we assure you of our best co-operation always for the close and lasting scientific relationship.

OMICS Publishing Group, the publisher of pancreatic disorders and therapy has now the member of/publishing partner of/source content provider to CrossRef, PubMedCentral, Directory of Open Access Journals (DOAJ), IndexCopernicus, ScientificCommons and EBSCO, which enables the dissemination of research articles to the global community. OMICS Publishing Group uses online review, editorial tracking systems of Editorial Manager® for quality review process. According to the data available, OMICS Publishing Group has millions of readers and currently publishing almost 200 world class journals under the subjects of Clinical, Chemistry, OMICS, Engineering, Pharmaceutical Sciences, Environmental, Life Sciences,

Medical Sciences and Management. OMICS group is known for international quality and standards of articles, published in OMICS journals, using state-of-the-art prominent reviewers and editorial board. OMICS group also monitored database of drugs encyclopedia of bioequivalence and bioavailability (E-BABE), which provide access to the different formulations. OMICS group accelerating innovations and discoveries in the science by organizing more than 30 international conferences annually, which provide a platform for global networking and connecting scientific community.

OMICS publishing group is the harbor of more than hundreds open access journals. The mutual consultation and exchange of thoughts is particularly strong with the OMICS publishing group journals. Conversely, very limited peoples including scientists have the benefit of such a multidisciplinary preparation and the journal is now having the value of international repute in the managementof pancreatic disorders and therapy. The editorial members look forward to publish beyond doubt multidisciplinary manuscripts of the utmost feature in the first issue of the journal. Several aspects have been taken under consideration for the acceptance including novelty of the paper under scientific discussion to the particular field in the journal of pancreatic disorders and therapy. Primarily we hope that the coming issue will unlock the conversation with other disciplines or will strengthen such dialogues. Health professions such as researcher and physicians played an important role in the diagnosis of chronic diseases and the development of different therapies for the prevention and treatment of diseases. We hope that the outcome of this journal will be a potential step forward in understanding the role of different tools in the pancreatic disorders and therapy.
