### ABSTRACT

In the area of positiverelativism various theory based creative developments have been coming to being for the purpose of add upping and inclusively incorporating into the area of diversity democracy as well as purposively to use as the guiding principle while government structural adjustment could be framed and built up specially during the phase of Politicopositivism as well as might begin from the phase of Politicorelativism. In such a way, the following theories have been developed for the aforementioned purpose. In this regard, based on the possibility of adjustment taking hold especially while phases of diversity democracy proceed to the last Politicopositivism as advancing the major events taking holding while the second phase of Neo Politicorelativism making paving the lane towards the last phase as the bridge taking into consideration as if obliged. This becomes the philosophical understanding and guiding principle of couple with other theories formerly built in the area of diverse identity. The theories include Ecolopositiverelativism, Politicopositiverelativism, Econopositiverelativism, and Sociopositiverelativism.

**Key Words:-** Ecolopositiverelativism, Politicopositiverelativism, Econopositiverelativism, Sociopositiverelativism

### Introduction

Diversity democracy is a politicoeconomic ideology that target to handle in a well and democratic principle all diversity and diverse identity that exist among any known community anywhere exist across the globe. It is a type of democracy that aimed to build up recognition, respect, appreciation, acceptance among in democratically governed known communities by taking into consideration the protection, preservation and recognition of diversity and diverse identity belongs to them as human right as if beyond consideration of reality on the ground among the respective community of any couple with democratically governing administrative protocol prevalence for the realization of the way democratic governance and democratic right in the well and fully manner (7Meseret Bekele, 2021). Besides big ideal of the same ideology taking into consideration of diversity and diverse identity exist couple with human right preservation with taking into account the existence rule of law as the universal level as if couple such consideration and reconsideration of the locally exist reality among any community as if obliged including the issue belongs to personally for the members among the same and other respective community

(9Meseret Bekele, 2020). Furthermore, the realization of the inculcation and full realization of the excepted appropriate positive perception and outlook that related to the area of positivism and positivity as stating in the same way as the development of positive attitude building among those diverse identity having group of communities elsewhere across the globe regardless of any discrimination, prejudice, stereotype and partiality that taking into account as the major ideal delightfully consideration giving with in diversity democracy (8Meseret Bekele, 2020).

As has been stated above, diversity democracy inclusively targeting all reality including social, economic, political, norm building up, perceptual up holding, communally exit reality on the ground, rule of law, communal as well as personally being membership holding in the same community related reality consideration based human right taking holding as among the elements to be taking into embrace in the area of the same ideology to come up with inclusive way of good governance into place in pragmatic approach(2Meseret Bekele, 2020). In other words, it is a type of politicoeconomic ideology that targets to inclusively include all diversity and diverse identity of any kind

in political governance to come up with more democratic, prevalence of rule of law, consideration of reality among any community, preservation of human and democratic (Meseret Bekele, 2020; 3 Meseret Bekele, 2020). Means to end as if taking into holding with its own phases as obliged to that of the same politicoeconomic ideology. The means is the mentioned ideology as if the end result is the decision coming up after the fully implementation of the same ideology and beyond. In other words, the same politicoeconomic ideology developed to come up with the means to take hold final result as the end result to become coming with fully recognition, respect and toleration building up towards diversity and diverse identity as if respect and toleration building up diverse having community as if also taking holding with positivity and positivism building towards each as the perceptual and outlook towards in positive manner (2 Meseret Bekele, 2020). Besides, among diverse having as well positivity and positivism taking holding between institutions as well as constituted and to be constituted communal by known communities to that of their members but as the case of global dynamism must sustainable taking place even with speedy as if the same ideology at last must taking hold not only positivism and positivity taking holding but also relativism and relativity with in positivism and positivity as to the case to come up with the fullest terms of the end result of the same ideology (7 Meseret Bekele, 2020). In such instance, the same ideology development or fabrication aimed to be coming with a means to work on the way diversity and diverse identity taking hold in the governance of all round towards human right taking holding and recognition given in universal way (2 Meseret Bekele, 2020). In other cases with more inculcated into the way positivism taking into consideration aside with go well with and towards the global dynamism as nothing become smooth and absolute as if consideration taking the latter inculcation of relativism with in positivism as if must be taking hold in diversity democracy at least in the last phase or begin with the second phase of the same politicoeconomic ideology. As same ideology must incorporate additional relativism case for the realization of in corporately taking hold work engagement successfully implementation taking place as if the latter issued additional development of theory for the purpose of realization of the final end results of this new ideology. To realize the stated purpose of theory development in the area of creative development, the manuscript taking hold the following study objectives i) to develop theories in the area of positiverelativism to take hold with in diversity democracy ii) to justify in reasonable way the area of positiverelativism perspective in line with the discussion taking hold of the developed theory iii) to discuss the developed theories in separate.

## Result and discussion

### Overview on the area of developed theory of positiverelativism

The consideration area of diversity democracy in relation to positiverelativism become new concept. In the same area idea building for positiverelativism in aggregate as well as separately among the independently taking into embracing theories of positiverelativism as if possible. For such issue of consideration,

the latter exhaustively included with in this study. In such case, theory building in the area of positivism or positivity building as well as relativism based kinship and family based interaction, intercommunication and intercommunication taking holding as if among the latter Econorelativism, Sociorelativism and Politicorelativism taking place so far. Likewise, in such a way as another area of creative development as if area of relativism building in positive way with positive perception and attitude towards inclusively all way with in positivism and positivity taking into consideration as if also obliged and taking into reflection this relativism building for the area of positivism and positivity area of at least at Politicopositivism phase of diversity democracy taking embracing activities and task accomplishments. In such way as positivism and positivity requires more major interconnection, intercommunication as well as any interaction in positive way as underlined within the theory of positivism and positivity as if relativism issue taking into consideration while adjustment of sectorials in the case of public and administrative structure framing, designing as well as the work towards making favorable for the usual accomplishments of any kind as if project based to contribute and enhance more towards the realization of the objective behind well done positivism and positivity based work of implementation, interaction, interconnection as any interaction and interconnection in the area of the same and other institutions also requiring the way interaction and respective interconnection taking place. The realization of the objective behind any accomplishments as if based on this categorical case of institutional and sectorial based structural interconnection and adjustment while institutions of any diversification taking holding as if the major one is simply incorporation of all diverse and diverse identity taking into consideration based on line upping public and administrative structure building either top-down or bottom-up unit of management institute engagement taking into place belong side of obligation concurrently by attachment and interconnection based sectorial mission having to taking hold all institution as diverse identity inclusively taking into effect towards the mission of accomplishing the ideal and goal realization of diversity democracy. As to such issue of relativism based interconnection usually consideration while positivism and positivity building taking place. In other words, on such case at least to make suitable the stated goal realization as if structural or political adjustment during phases of Politicopositivism or Neo Politicorelativism of diversity democracy with consideration embracing of relativism adjustment building sectorially institutionalizing among those institutions as economic, political, ecological, social context and other as required. The same adjustment taking into consideration for the sake of administrative structure building as a big protocol of good governance that taking hold all round positivism building not only the realization of the same positivity towards each other among the community and members of the respective community of any as also for the sake of the realization of well planting all diverse institutions as well as identity taking holding among respective community as well as their members. In other words, works towards the sake of the simplicity as well as suitability of any project task accomplishments of the issue of making adjustment inline with not only the ideal of positivism and positivity but also with in

that ideal inclusion of relativism based work engagement as if mandatory. While positivism taking holding as a big theory of the same phases as of under such the way relativism inculcate into lining towards adjustment structure building or development in the same political ideology as the phases requires protocols and the way structure to be built as if separative based sectorially as ecological, economic context as well as other context as stated above should be issued. Positivity and positivism building towards ecology usually more appropriate specially taking into consideration such as to wisely and appropriately utilize the natural resources at the local level and even beyond. For the same case of simplicity that to be structure adjustment during phases of Neo Politicorelativism and Politicopositivism in diversity democracy as if building positivism in relative way as if must be taking into consideration. Positivity building towards ecology in relative way with other appropriately to be holded institutions or contexts as if in relative way to each other to mean that working for ecological purpose must be interrelated with other environmental as well as the utilization of natural resources as well as political institutions as well also economic fiscal institution or economic and financial institutions sectors. As to such the major area at least taking into consideration inclusively as ecological couple with handling of scarce natural resources as Ecolopositiverelativism as well Economic, social and political as Econopositiverelativism, Sociopositiverelativism and Politicopositiverelativism respectively.

In such a way to come up with the ideal of Ecolopositiverelativism in inclusive way positivity building towards ecological handlement as well as wisely utilization of the results of the same handled responsibility must be appropriately seen in the eyes of positivism and positivity building in relative way by incorporating in a well manner with other institutions as well as other sectors taking holding while adjustment and structure taking into consideration. In such a way as of taking into placing political administrative responsibility protocol and engagement of the handlement good governance as among the elements taking into embrace for the same purpose tackling the way ecological and other scarce resources handling taking place couple the way utilization taking hold as well as economic fiscal taking holding to realize the ideal incorporated with in ideological based Ecolopositiverelativism for similar and the same purpose nationally as well internationally coming up with rule and regulation in relation to first the way ownership issue case as well compromising and uncompromising issue taking into accounting based on legality based of respecting the right and fate of ahead generation as universalisation must be essentially obliged. In such case as if the area of consideration must be issued in the timely consideration given sectors, institutions as well as needed and demanded taking holding of the sectorial based on the mission and vision at the time taking holding. As to such issue of positivism and positivity on one part and relativism building among those consideration given sectors, institutions, adjustment needed with in different sectors taking into consideration is obliged. As to such, much labor, much capital, much skill, knowledge, positive attitude might be needed more than today's consideration given as the phase might consideration given also. In such way, relativism building

to interconnect, making to interact the tools and means and even way taking hold to realize the same and other objective related to the aforementioned mission, vision, and objective behind Politicopositivism phase of diversity democracy and beyond. As no absolute with consideration of positivity and positivism as if relative way building for the ahead communication, interaction as well as work engagement taking holding enhancement as to the respective positivism and positivity as if also must be consideration given as dynamism ahead must be taking into place with speedy as such might taking hold the way the ahead generation leading livelihood without compromised by the subsequent belatedly generation and then followed for the ahead again also.

### Ecolopositiverelativism

In the area of Ecolopositiverelativism more enhancing the way ecology to be conservation taking hold to realize more sustainability in the area of not only ecological management but also waying to the way more sustainable conservation and preservation taking into place for the sake of having more appropriate utilization of scarce natural resources to bear upcoming the taking into holding of wisely utilization of the same agenda of natural resources elsewhere exist bit also equally consideration giving taking hold as ownership belongs to the whole global citizens. In other words, if the case of the way conservation and preservation taking place become ill prepared as if scarcity usually more intensely resulted as the impact finally bear more outcome with the case leading to those scarce and non renewable become way towards extinction. As to such unmanageable utilizing might totally and partially having negative impact and can bear violation of the right of the future generation that might possibly consideration given as lacking knowledge of right of the building of appropriate respect for the ahead generations to not only negatively impacting the way they would appropriately leading own livelihood by using the timely exist natural and other both renewable and non renewable resources due to ill utilization or well handled by the predecessors generation due to lack of understanding and other means that usually resulting ill consideration giving of inheriting the globe as the whole ownership belongs. In this instance, making any generation to not take hold what appropriately must take hold specially in the area of ecological as well as resources for the sake not only living aside population but also the future generation ahead as if must issueing possibility at least lead to the extinction of human species totally or partially as if the case of selfishness upholding any resources must be taking into consideration including any ecological based exist of biodiversity as if the case of extinction of human species largely resulting due to extinction and damaging ecological as well any resources exist specially the case natural resources become unknowingly or knowingly as if undoubtful. In such area as if belongingness stating with ahead future generation also must be consideration given as if in this theory belongingness consideration giving via wisely utilization of any resources without compromising the fate of future generation as well as through conservation of any ecological elements as if taking holding at the global level as if must be consideration given via universalization based on consideration of legality and other instruments taking into

account to make save or safely taking hold the agenda of Ecopolositiverelativism. For such, making the subsequent generation taking holding what the globe inheritance to them as if compromising with inheritance becoming more selfish and could the way understand the natural right of the ahead generation either the case of short term two or three generation as well beyond for the long term case as if must be manageable begin now onwards.

As to such to come up with positivity and positivism taking holding not only for the environmental and ecological consideration in a way to sustain its all elements, the generation of any living and livelihood leading taking hold but also for the sake of knowledgeable based protection and safeguarding of the ahead generation right of any, specially, the right to utilize well properly and wisely without compromising the way their ahead generation lost nothing because of their appropriate handling of the target ecological and environmental constituents as if also the case must relatively building taking holding to fully realize the objective future generation of any to not violate the aforementioned right of wisely utilization as if taking hold and making among elements to be constituted while governmental or public administrative structure could be framed and building up begin from planning phase of the same consideration. In such case the ahead generation usually sharing what they taught from their fathers and forefathers as the generation as if commonly exist. So therefore, any generation must share and positiverelativism based on ecological and other necessary inheritance case of building up as the cultural and societal norm could must be the whole generation whether the case of horizontally as well as vertically inheriting and sharing to each other including the way lesson and education or socialization to fully plan, accomplish and realize the area of responsibility bearing for the ahead generation by any generation ahead predecessors taking holding. Especially, this could also be mandatory as any livelong building of human species totally depend on the way the same species utilize resources at hand and conserve to sustain live on earth specially in case of human beings while generational responsibility taking holding as if obliged.

Alongside to the aforementioned themes and ideals taking holding, hampering of any ecological and environmental constitutes as if must be banned to not wisely utilized means to not consideration given the right of fore generations as well as ahead of the latter also. In such a way lacking such understanding and putting into effect the way uncompromised must be compromised case as also the vise verse must be issued. The case issue in positive manner as well as positivism and positivity with relativism to include within sectorial development alongside with other sectors as well as among each other various ecological and environmental constitutes of severally exist natural resources including manmade resources should must be inherited to the ahead generation as the right belongs to the latter. For such scarce resources of any should possibly inheritance allowing must be getting legal framework not only at the local level but also at international level as if the case issue of scarce resources should manageable taking holding as if obliged. In other instances as if scarce natural resources as

the case largely bear impact on the way the subsequently ahead generation livelihood leading taking into account.

As to such issue of taking holding positive perception towards not only parallelly and timely existing generation but also towards the benefit to be bear for the subsequent generation ahead to use wisely the scarce non renewable natural resources as well as to simply to realize the sustainability live and aliving of human species across the globe. As negative perception holding and unwise utilization easily damage the way generation work up on with positive attitude towards sustaining live and aliving as if making manageable the well handling with good perception as the otherside might directly result unconservational handlement of any natural and manmade resources as if the latter must banned in a legal base not only at the local level but also international based making also obliged. As such issue also encourageably working up on towards sustaining the potential of ecological protection as well as for the fully realization of more positivity sustaining or targeting to sustain live and alive as if must be a well done area as stated above also must be encouraged with optimism taking holding. But areas of encouragement bearing taking holding propagating and advocacy building through various means and methods. As to such making fun the consideration of mentioning wise use of natural and any resources exist as if considering as unwise project to limit the wisely utilization of the national resources by the regime holding elites as well as with their families as if among the taking into consideration giving as such laughing at such wise elite project and advocacy must be illegality taking into consideration not only at local or national level but also at international level as if must be seen as banning case. As such laughing at such work and work engagement and making positively working on the area humorous or comical and using for ill consideration given using as black naming simply among making such as the political advocacy of the otherside inappropriate case of attaching to opponence competing for the timely power handlement as if must be banned legally as the criminal act against human alive hampering and damageable act towards the sustainability of human species on earth as such issue of working on as also must begin prior now onwards. While relativism taking into consideration with in positivism and positivity as if the issue dynamism taking into consideration towards more positive attitude as the case interaction, interconnection must lead to the more thinking and perceiving towards each other in coherent way and more positivity taking into consideration first towards ecological and the scarce natural resources taking hold as well as other resources also emanated from the ecological handlement and the way the generation utilize the scarce resources as if waying towards sustaining and even creating new way that might lead to the preservation the natural resources as if also by using small or few natural resources then coming up with more productive creative works that can make able to handle another additional output result as the case of the final outcome of the utilization of natural resources must ahead coming with additional resultant output through modification, additive case consideration as well as recycling issues and beyond.

## Econopositiverelativism

In the area of Econopositiverelativism area of consideration, similar to that of Ecolopositiverelativism, as if issues of economic context not only positive attitude building but positive interconnection building with other sectorials and institutional handlement with taking into consideration the area of economic diversification of the case of means, modes as well as economic activities must built in relative to other institutions. Here, according to the ideal behind this theory of Econopositiverelativism interconnection is obliged while structure of any taking into consideration with economic sectors as well as vise verse. While positivity issue taking place in the area Econopositiverelativism context direct linkage building in relative way to make not only interconnection but also building interdependence to sustain one among each other as if independently in separate way inconsideration of building positively might be related to disconnecting and finally bear sectorial separatism taking holding might lead to damaging the already built and expected to be developed as well as other taking into consideration means of sustaining the live long context of all institutions in equal terms as well as positivity in one area or any sectorial institution much in reach with another nearby aside having sectorial institutions. As to such, while institutional handlement, structural adjustment taking place as if interconnection based on positivity and positivism taking hold in relative manner as if also must be issued the correlation between the institutional sectors as well as the livelong handling of the whole sectors to manage resources taking hold easily and protecting unwisely utilization of any resources come up after separating all diverse entity context and institutions as if must be taking into consideration while the structural adjustment taking place in a way positively and positivism taking hold towards all sectorial institutions as well as the same or other similar sectorial structural adjustment and structural framing taking place to make well function in interrelated and interdependent way as if also must be seen with the eye of relative way as of this lead to and bear with way resources handled in controllable way towards the realization of wisely based utilization for all but controlling to the way minimal based cost effectiveness with efficiency taking hold in more utilization coming with more output at the end result but impact based taking holding positivity and positivism building of the case of outlook and perception upholding as if the case never compromised but issue of taking holding saving the scarce resources to be coming at the final end result to be the way towards generational compromising and uncompromising as if indication bearing as the objection for the ahead generation coming towards the predecessors might totally or partially in unwise and with holding ill caution taking to inherit the barren resource of the globe must be banned as legality taking into consideration if possible. As to such, the ideal of the same statement usually indicate that uncontrollable mischief and unwisely utilizing while positivism and positivity negatively impacted due to varying internal and external factors to that of sectorial institutions as if legality issue must be taking into consideration to realize the former problems affecting the generation.

## Politicopositiverelativism

In the same way with such issue of Ecolopositiverelativism and Econopositiverelativism as the area of both and beyond requires political adjustment with necessary protocol to realize the mission, vision, objective as well as final goal of sustainability of the livelong generation upholding. In such case mentioning not only political ideal making sustainable to sustain timely peaceful coexistently livelihood leading as well as interconnection, intercommunication as well interaction among the timely exist community as well as members of the respective community and beyond but also issue taking into consideration of the livelong living generation by making to inheritance developing the way we do more as the way the generation ahead do best via similar objective and aim mission taking into consideration via socialization as well as positivity for self generation as well for the ahead generation in subsequent way upcoming. In such a way the fate of ahead generation might not only on teaching citizenship education for the timely based coherent building among the existence of diverse entity but also ahead would come ahead would and will all think for all global citizens and civilization ahead to more flourish as if making political adjustment as if impact bearing on other institutions must be equally taking into consideration. The case of such not only restricted to timely building multi party system as if also consideration giving of the ideal of certain ideology as if must consideration given the fate of future generation by appropriate means without hampering any divergence, diversity, diverse identity, human right violation, reality exist anywhere but issue of future must ahead given as a mission as the case directly related the living and livelong sustaining of the human species for millennia and beyond from now onwards. As to such ignorance and discrimination of party based of building multi-party system or other means as if never be thinkable as diversity democracy thought based on or begin with political ideal divergence. In other words, the latter theme must taking hold the same adjustment while coming to work on such Positiverelativism as if also issue of institution based sectorial structural framework existence as if also must be taking hold while taking and coming with Politicopositivism ideas that regulate the way political context of the respective country to be regulated in separate as well as with other parties as if with varying degree diversification in political ideal as if might exist as such also leading the way to having additional opportunity the way the national politics could be regulated and manageable taking hold. As an ideal behind the same Politicopositivism as well as the phases it holded of Politicopositivism as if framing the political structural administrative adjustment based on inclusive way as the way all its procedures should inclusively regulate all sectorial and institutional sectorial implementation as if having its own mission and vision based structure to the local unit as decentralization and devaluation of power to the stakeholders at the bottom including to the unit administrators as well as representatives of the community that chiefly exist including those handling the local customary law in varying degree. In the same way bottom up information delivery in a well manner to fill the gap that might created while report delivery in seasonal or regular term based taking into considerations lacks unanimosity as if among the one that must

be taking into consideration to assure what is planned as well as taken as a mission usually taking into consideration in an inclusive way as if morality as well as legality issue as among the issue of consideration given. As to such issue of morality as if must be issued in any implementation begin from planning period as if also the case usually hatred must be healed in the same way as the usual positivism and positivity taking holding among in relative way as if also alongside to that of the preservation and protectional of any right kind as if also issue managing each and every sector making suitable and appropriate for the case coming up with good governance as if must be issued and also must be seen inclusively in all sector based mission taking of the case as if interrelated sectorial based in inclusive way. As if also taking into consideration within and inter-party political agenda might varying degree taking hold as if exist as diverse idea having possibility big chance for the couple of countries as history shown as but diversification with positivity alone largely finally might lead to merging the opportunity that diverse ideal create in the political sphere. So therefore, diversification taking holding positivism and positivity as if also positivism and positivity diversification with in relative way as must be taking holding obliged in appropriate way. The issue taking holding positivism that began with relativism might followed with positivism relativism in any way while the political ideal of diversity democracy taking place. As to such issue of diversification couple with the issue of first relativism and relativity taking holding then followed by or ahead of such positivism towards diversification then ahead as stated above positivism and positivity as if concurrently with positivism in relativism way from within intra-party ideal as well as interparty ideal. Ideals as if must be taking holding must whether the case of idea expressional issue as well as mentioning and stating such party based or elite based idea taking holding. Majorly as seen in the history of human being as well as state formation and state building as if the case minorly taking holded. As to such now time might consideration given as if obliged as additional opportunity gaining usually comes from varied degree diversity exist ideals and idea stating in any way based on the principle and philosophy of positivism and positivity taking holding. What must be consideration given here is that all must recognize not only the way positivity and positivism coming up with positive outlook but positive outlook existence in pragmatic way as well as must be put into effect as if must and obliged.

### Sociopositiverelativism

In the area of Sociopositiverelativism as if all sociocultural elements timely exist couple with at a time innovation acts as if must be consideration given in positivism and positivity related relativism taking holding consideration given in as a separate entity but also as the cooperation and inclusive way of stating mission own having as example tamely existing cultural norms, societal ethical values language consideration as well as at a time and priority existing and taking placing innovational and invention acts as if the issue of sectorial building for the well done at least at certain level issue of researchability to come with new innovative act and creative development as also must handled and consideration giving must be issued. This what is

consideration given as the fundamental assumption of sectorial structure framing and building as if also must be stated well in well planned form. Additionally in the area of well done sectorial structure development and adjustment or reshuffling as if taking holding not only new innovative acts the way innovative acts taking into consideration the more existence one or alive sociocultural elsewhere as if must be appropriately taking into consideration and such issue as if also must be inclusively taking holding as a vision based mission taking holding. As such any invention and innovation act must be coming up with newly add upping knowledge, skill, criteria taking holding as if also taking holding the way guiding line issue in while innovation act taking into consideration but if the element of certain invention mismatch with the existing societal norm as if must be seen with caution but diverting the existing norm without add upping as if must be seen from different angle as the case might sometimes without add upping to the existing knowledge and norm building side effect alone resulting might exist. For such sectorial based own structure or in combination with what has been taking holding specially coming up with assessment of the case usually usually taking into account as if obliged. In some case might negative impact bear by the mentioned invention as if taking holding as an impact and resultant consequence exist for such issue consideration giving assessment not only based on quality as quality issue improvement easily possible but the would be criteria based impact bear and might result ahead with pre adjustment requirement setting must be into place. In the other area Sociopositiverelativism issue the independently with interconnection taking holding sectorial adjustment and structural building to the local unit to sustain and banning any hamperance the positivity and positive outlook taking holded and related perception as if minorly or majorly what incorporated and constituted as if any social context that timely exist as globalization issue usually showing as speedy global dynamism. As the case banning any hampering agenda should also be must banned positivity as if also must be sustained as a regular issue of implementation to be worked up on as if must and obliged. In case of Sociopositiverelativism interrelation building with the so called other sectors the issue social and cultural context structural framing and adjustment is must be taking holding obliged. In such case various social and cultural norms of any society must be reflected in the way Politicopositiverelativism taking place as well as Econopositiverelativism taking holding ethical or socio-ethical norm building as if engagement in any economic activities as well as utilization in a positive way of mode of production as well as means of production must taking hold the norm and ethical values that the known society or respective known society built and developed for more interconnection to work together for mutual benefit of consideration giving all members of the respective community as well as way of building norms also must reflect the way the whole community or national issue leading livelihood as if in modernity taking into consideration and in the way reflecting advancement and global dynamism context incorporating cases as to such no static way of normative as well as social ethical values taking holding but all must be modification taking hold as if the interrelation building with positiverelativism way with other areas as if also must

consideration given all aspect of global context whether the case of dynamism as well as other creative development that usually lead to the \global dynamism way in speedy way as if all should be incorporated to the way positive relativism building taking place couple with the local static-dynamism taking holding context. As to the latter static-dynamism as if nothing consideration given all the time revolutionary based change orienting or consideration given but reform through regime changing, changing party ruling the regime holding of the nation as if taking into consideration must be essentially taking into account case obliged. In such way always revolution in any way excepting as if majorly changing normative and total societal ethical as well as the way livelihood taking holding in total way as if in the eyes of modern sense mainly distractive taking holding as if must be consideration given as usually during modernity time period a number of usual creative and innovative acts that the livelihood of the global citizens based on livelihood leading taking place as if harmonization might be issued not only peaceful way livelihood leading but total destruction of for instance the case of flourished industrialization exist elsewhere unmanageable affected means total distraction variably lead to destruction of the livelihood of human species as well as biodiversity else exist. So therefore, to combat such destructive negative impact having as if normative as well as societal norm of ethical values that totally or partially able to combat such negative impact must be built among all known communities as if mandatory as if issue of problem of positiverelativism guideline in the area of social and social context among elsewhere exist known community as if finally reaching elsewhere across the globe as if unquestionable as such also consideration given as among the negative impact bear by globalization issue. Issue of such universal based principle and guiding line of Sociopositiverelativism as if must consideration given as well correctional methods and means based on its own fundamental assumption as if must be taking place. In such a way issue of manageable combating the global destructive norm and normative building must be seen in the eyes of global context to be banned if exist and seen. The area of consideration given of Sociopositiverelativism as if must be equally seen as among the major area of Ecolopositiverelativism, Politicopositiverelativism as well as Econopositiverelativism. In such case without Positiverelativism based norm and societal based values consideration guideline, principle and philosophical understanding building as if realization of the above elements in fully or partial way as if questionable.

## SUMMARY AND CONCLUSION

The area of consideration given in the study is positiverelativism as if coming up with different theories based for the area of incorporating into the way cultural relativism foundation diversity democracy as well as inclusive diversity democracy could hold the area of varied institutional and sectorial issue to be while framing governmental administrative structure taking hold for the purpose of smoothly running the governance in the area of diversity of any kind specially in at least of phase Politicopositivism as if the case positivism and positivity taking holding with relativism taking into consideration based sectorial

based institutional handlement well as if consideration of positivity must be built in the area of Ecolopositiverelativism as the latter theory stated positivism and positivity issue taking into consideration the livelihood of human being with ecological, environmental as well as resource handlement as if any but also incorporated into political positivism and positivity with its own theory for inclusively interconnection taking into consideration having its own guideline and assumption taking hold as principle and philosophical understanding as if such theory called Politicopositiverelativism. With other regard, the case of any societal norm built earlier sometime beginning from anciently taking holding to that of recently built and developed based on the criteria already setted to tackle the side effect would come along specially taking holding formulas theories etc as the norm some existence among any locality as if also in line with such consideration of positivity and positivism in the hands of Positiverelativism issue taking place to that of any economic engagement, mode of production as with time dimension of sectorial institution based structure having elements of Econopositivism as if the major to be taking into consideration with in this study.
