## ABSTRACT

Recently various theories of identity have been developed in line with the coining and conceptual development of diversity democracy for the utilization in the area the achievements of the recognition and protection delivery for the existing diversity and diverse identity equally to that of the holders of such diverse identity of any as a guiding principle and philosophical thought. Besides, those theories have been come to being as the major protocol of the stated politico economic ideology of diversity democracy. With diversity democracy taking hold issue at international level theorizing the same thematic area to be used as the guiding philosophical principle to lay down the background to include the issue of diversity and diversity equally with other already existed criteria of international relation building determinants among statehood. In such case possibly philosophizing the area of domestically taking into consideration of the way diversity and diverse identity handled and protectoral delivery taking hold to level at international at least in the affair of international relation as well diplomatic mission holding. The agents must retreat from violation of the right of diversity and diverse identity holding communally as well for the members of the respective community and beyond. For this purpose, one additional theory of diverse identity as if developed and included with in this study with strong philosophized justification.

**Keywords:** Diverse Identity Theory; Diversity Democracy; Diverse Identity; Diversity

## INTRODUCTION

Diversity democracy has been the politico economic ideology that guiding the big ideal of the universalization of human right couple with the recognition and protection of diversity and diverse identity as any reality exist among diversity and diverse having communities taking into consideration. This politico economic ideology become recently coined and developed to realize the area of respect and protection delivery as human right consideration for diversity and diverse identity constituting communities exist elsewhere across the globe. Equally consideration as indigenously exist diversity and diverse identity of social as well as economic practices that become indigenously exist and make contribution for building identity of any community as communal as well as individual members to guide the way livelihood leading taking into account as well as other newly adopted as well invented and delivered by strong holder of the member of any community having diverse intent as if also

consideration giving obliged. The issue of personal invention and innovation taking into consideration as well as the right of the inventors and their collaborators must be issued according to the ideal of diversity democracy. Likewise, in the area of international relation such issue as if also must be consideration given communities [1-4].

During the era of globalization issue of intercommunication and interconnection at international level as if mandatory and taking hold such international relation has been also simple and easiest. In such case easy international relation building among states as if mandatorily requires timely determinants that inclusively modernity taking holding not only actors but also big nominally communalized builder determinants among statehood having certain communal values at internationally recognized taking hold first. As the case of ideological values contributing intense in building common shared values to take hold of utilization to deal up on around not only restraining the interest

of the determining agents but also statehood formed governing body take hold shared and communalized values alongside with theories and perspectives of various kinds that the country take hold to determine domestic affairs policies as well as formulation or inaction of laws as if the big mandate having as if among such, the politico economic ideology. In such case largely political philosophizing as if obliged to came up with together building among states as if sovereignty building as if also among the majorly contribute taking and having for the global citizens as if coming up with new area of consideration such as economic or politico economic and beyond as if at least sharing good thing and goodness with other diversity and diverse identity having in similar area or the same area. But diversity to mean that not totally isolation of means of communication as well as interrelationship hindering. But issue of such must to come up with sharing certain values at international level and big mandate taking to contribute for having shared values among largely diversity and diverse identity having communities to more interconnect and intercommunicate more in easiest way. That is to mean to build interrelationship and to make easy intercommunication as if must handily easy way shared social, economic as well as political ideal shared values as all considerable taking hold as the statehood level not only easily interconnection but also unitarily making self-based and other based alliance formation for more cooperation building taking hold interconnection. The builder must take hold the determinants of the interrelation determinants with shared communalized values that at least recognition gaining at least among to be interrelated statehood formed agents and representatives of the respective states (Ibid) [5].

For the same consideration recently new area of politico economic ideology developed for the consideration of diversity and diverse identity equally with the universalization of human right giving priority to that of any developmental elements. The diverse and diverse identity based recognition giving and right preservation ideal taking hold as if called diversity democracy. Diversity democracy as the major ideal taking hold various different and various theories in the area of identity with taking hold relativity as well as positivity while relativism and positivism become the major ideal and philosophical thoughts that taking into consideration in the same politico economic ideology of diversity democracy. Hopefully, the developed politico economic ideology as well as related theories of identity various kinds totally targets to heal the formerly hampered area of diversity and diverse identity as well as positivity and positively building right preservation for all without any partiality either with diversity of any taking hold including geographical settlement area.

As has been stated above the recently developed ideology become taking into embrace as a major determinant of future global events as a major globalized values in the area of not only economic and political taking into consideration but also areas of diversity and diverse identity with any natural and human as well as beyond right of any mandatorily taking into consideration given. In other words, it states that any diversity and diverse identity should be recognition given equally with brotherhood communication and interconnection as well interaction building in a positive way with positive attitude to

each other and beyond with at the top of the governing elites as well taking into consideration in global way as if compulsory. As to such, the diverse having identity of any as well as the governing elites as if must consideration as the representative of not only to the state but to all diverse having community of any including taking into consideration to all of the members of diverse having communities. With this regard, this paper coming up with the area that must be taking into consideration while sovereign states are participating in international affair. In other sense constructively taking holding the issue of diversity and diverse identity taking into consideration of the human right preservation and protection for the upholder diversity and diverse identity having community of any elsewhere exist as if must taking into consideration as the big values of diversity democracy to determine the way international relation building to be handled and handlement of ways and lane paving mechanism to realize the positively taking hold international relation agreement even to incorporate those engaged sovereign states to work collaterally with each other towards the fully realization of the recognition, protection, positivity building as well as right protection of those diverse having communities of any whether at domestic level as well as beyond among themselves and even beyond of the one that each having friendly with among each. The major area as if taking holding international relation building based internationally taking hold law targets to handle the diversity and diverse identity exist elsewhere as if major issues of managing the collateral among as if obliged as if to deed well concurrently on the area of the same philosophical thought among other countries to fully handle the issue of diversity and diverse identity as the case directly related to humanity and human right of living lively leading in harmonized way as if obliged [6-8].

For the sake of simplicity this paper come up with the following study objectives I) to develop the theory of diverse identity to utilize in diversity democracy at international level ii) to analyze the area of diverse identity to be incorporated into international relation building among sovereign states iii) to give justification to the developed theory of diverse identity in constructive way [9].

## RESULTS AND DISCUSSION

### The Major Area of the Diverse Identity Theory

Theories of identity are developed recently under various topics. But, issue of international relation requires mandatory to determine the way sovereign countries taking hold the issue of diverse identity in line with the universalization of human right. In such case, this theory of diverse identity taking into consideration as the major principle while international relation taking hold by various agents of the statehood interrelationship builders to restrain the interest, wish and will of the builders as well as the common agenda of the statehoods belongs to that of the agents taking into hold at the global level based on the ideal of diversity democracy become among the major global and globalized values that become mechanism and means to restrain the mentioned well done international relation to make smooth the relationship to be built as well as the formerly exist taking hold to make a modification as well as modification based on

the ideal of the diverse identity theory of theorizing diversity democracy as the major global based politicoeconomic taking hold as the major values that must be shared among the countries taking hold participation together with their agents. The mechanism to make value at the global level as if diversity democracy based global value taking into consideration as such case directly lead to the hampering taking hold at international level as the major voice for the voiceless based on the ideal to be critically seen. The case of critically taking hold the major issues of diversity and diverse identity equally with the preservation as well as universalization of globally taking hold universalized human right protection to uphold all diversity and diverse identity as the global heritage taking hold requiring protection, respect building recognition as well as positivity and positively based internationally international based incorporation with the issue of international relation building taking place at least among countries of diverse identity constituting as if internationalization of diverse identity incorporation into not only with domestic politics but also at international level while international relation building taking place and beyond. Membership having with international and regional as well as gaining international sovereignty in equal and official way to that of even the sovereign diversity hampering and handling as if must be taken into consideration by at least major power as well as anarchic based international organizations and other similar entities as a major stakeholders [10].

As in some countries human right violation is rampant and even taking consideration economic right priority giving to the preservation of human right rightly or wrongly as if issue of critical theories in international relation equally consideration the right of marginalized society based on historical analysis of both the international relation contributors and regime holders of the sovereign state as if new state coming to being coming with such ideal of equality for all diverse having within the state based on identity of any as if professionalism, common nation or ethnicity or linguistic and beyond consideration indiscriminate taking holding as if obliged. In such case while issue mandatory taking into place nation based equality as well interconnection with other countries as if must be issued.

Developmental stage of interrelation and intercommunication building must be taking hold diversity democracy as the big ideal of politico economic engagement taking hold as the big umbrella of shared values that interconnecting all round interconnection building in one as the case of umbrella making self for others. Building mother land as if the case ideology as if interconnection with the ideal of all as well as all to be as ours of yours based theory stated here above. The developmental stage to mean that all consideration of the stages of interconnection taking hold with talking beginning from planning to document assigning and signing by the representatives of the respective statehood at least under the single umbrella of political ideology based unity consideration for us for you based relationship building as if obliged. In such case to that of diversity democracy diversity based identity exist taking holding as the big requirements of idealizing the issue of not only diversity and diverse identity but also for the case of universalizing human right consideration and reconsideration as if domestically mentioning for such diversity and diverse identity for taking

hold right of humanity and human right preservation as if not to violate human right to mean among the umbrella of the requirements that as determinants factor y the statehood representatives make a talk up on [11-16].

Stage development of the talk making might begin from somewhere else among countries of the respective leaders or other representative agents taking hold the same or other talk but issue interrelation building by the name of international relation must taking hold the way diversity and diverse identity taking handlement at the domestic and even beyond that case of while building interrelation with other countries that rightly or wrongly pro or against the issue of well handlement of diversity and diverse identity. As to such well handling bilateral as well as three-lateral might well lead to the multilateral intercommunication between or among several countries as becoming membership as well as other required taking holding international relation. Issue of managing all international considerable handling of humanity, human right, violation of the right of diversity and diverse identity having in elsewhere status as if must be taking hold in international relation with minus or several countries. In such case issue of handling diversity and diverse identity equally or possibly or minimally among the requires elements of the case of safeguarding human right of the case of humanity based human right of the unalienable and unignored right as the natural one or setting. In such case right of the rights must be seen as the manageably taking hold first. Right of the rights to mean that the rights are the right truck builder and stating such right truck to be taking hold but issue of the right trucks must be seen from the side of the leftist ideal of lefting the side of the right as the case must be consideration given as the big ideal of diversity based democratic building in inclusive way as if normally diversity for diverse having and diverse identity for the taking holders as the right of humanity since humanity is to mean the right of the rightly taking hold living and leading livelihood. Since then issue of the rights must be taking hold from the side of the human beings as the human beings considerably humanity based existing citizenship and citizens. Since citizens and citizenship equally bilaterally coming together as such also issue of equality never be based on citizenship status or being among the member of certain group and beyond. But issue of such must be taking into place the right of the citizens to mean that the right of the rightly taking holding livelihood in a normal way. Since such issue still considerably lacking big ideal and fundamental assumption equally with rightly of the livelihood leading groups of diverse having communities in their own right way as if mandate taking by others to the way others as if wring and yours as if mine if you handle mine as if not must be taking into place as the wrongly judging the right of others as must be seen from the side of the evaluators of others wrongly and encouraging way of diversity and diverse identity as if also wrong to mean that harming at least certain community or individual level violation of right as if while the right man violates the right of self and by others considerable entity. In such case right is right as if the way people move and make a journey in large or small amount numerically to mean that at least certain group of people or diverse having community moving on such truck to mean that at least advantage bearing considerably taking holding exist

according to the ideal of diversity democracy and diverse identity theory that the latter must be taking hold with international relation building. Moving on the right truck to mean that right violation must be banned at international level as if making such as the big determinant of the to be holder international relations among or between statehood while their representatives seat or plan for certain similar and the same talk to build among the state of they are representing. Managing such is very essentially for the equality, equity, brotherhood intercommunication as if must be seen from the ground root and groundside. The number of diverse having communities taking holding numerically as if never be a matter of sense taking. Majorly or minorly the community might began from holding at least shared values of diversity and diverse identity of any kind as not only nation, ethnic, religious group, community else exist beyond including proficiency and professional associations taking holding as if obliged. In such case, intellectual community at any level of having membership of certain kind of proficiency as community of certain kind of having professional elite or skill or work engagement taking holding possible. In such a way might usually possible the right to mean the right having work engagement that at least benefiting self and beyond. This is the right and moving on certain right truck that must be consideration given not only at domestic level but also at the large among of the internationally existing taking holding among the national not alone but internationally exist community of the same or similar considerable entity of intellectuality or professionalism taking holding [17].

It is possibly to state as together we all can hold diversity and diverse identity as if also the interrelation, interaction as well as intercommunication among several dozens of having diversity and diverse identity as such working towards the full realization of banning hampering of diversity and diverse identity alone not but also realizing hampering free global citizens in equal way as such even equally consideration giving as the case of universalization human right issue with equally possibly issuing humanity must be handymen making obliged with equally of diverse having and diverse identity belonging to several dozens of communities to mean that brotherhood and brotherhood based intercommunication, interaction as well as interrelation building possibly issued as the case equally issuing in manageable way as brothers needing other brothers not only from aiding or neighborhood existing with regard to settlement area geographic consideration but also from distant away from the matter of settlement as if also socially, politically, intellectually international relation building must be a matter of this ideal of diverse identity theory as the base and cornerstone of determining and regulating international interconnection as interconnection always requiring determining as well as requiring elements taking hold that exist several years belongs to at least among certain diverse having community as norm already built or as the newly invented norm build several time years age or recently taking hold. As such issue of manageably taking holding diversity and diverse identity with equally consideration with universality of human right as humanity based on both the latter and the former consideration as if living and living requires several diverse entities as if taking

holder or latter initially recently taking holder from somewhere else as the norm become equally belonging to anywhere exist as if ownership based for the whole global citizens belongs to the whole without partiality and discrimination taking hold [18].

## CONCLUSION

The area of critically analyzing the way international relation building taking hold according to the ideal of diversity democracy as the big global event that taking into consideration as the major global values of politico economic ideology taking as if well summarized with in this paper. The major area of the interconnection building equally with internationalizing diversity and diverse identity protection and recognition equally with the universalization of the preservation of human right as if taking into consideration with in the paper as the major ideal. But, theorizing this as if mandatory as such issue taking holding within the work of such creative development as if coming up with new theory called theory of diverse identity equally consideration given with priority giving to human and democratic right as the former become big idea while incorporated into the analysis with full justification.
