

Ureteric Stone X-Ray

Evelyn K*

Longdom Group SA, Avenue Roger Vandendriessche, 18, 1150 Brussels, Belgium

ABSTRACT

All patients were undergone Routine blood investigations, Plain X-Ray KUB (Figure 1), Intravenous Pyelogram (IVP), Sonography,

and CT Intravenous Urogram (IVU) (In Some Patients) before surgery. For confirmation of diagnosis by imaging, plain X-ray KUB and Ultrasound was performed on each patient. IVP was also done before planned surgery. CT IUV was carried out for a few patients.
