

An overview of Surgery and Anesthesia for 2019

Priya Krishnan *

Department of Bio medical sciences, University of Hertfordshire, London, United Kingdom

Journal publishing has become more diverse and potentially more competitive with the emergence of new business models. Open access makes original research freely accessible on the web, free of most copyright and licensing restrictions on reuse. Despite a transformation in the way journals are published, researchers' core motivations for publishing appear largely unchanged, focused on securing funding and furthering the author's career.

Journal of Surgery & Anesthesia is an Open Access Peer review Journal from Scientific Research and Community Publishers publishes all research articles in the arena of Surgery & Anesthesia studies will always be freely available online and readily accessible.

It is a peer-reviewed and unrestricted for the readers and provides better quality for the development of scientific society. All scientific manuscripts are peer-reviewed by expert reviewers and the most eminent editors in our editorial board member to improve the quality of the article and journal. The editors welcome the submission of manuscripts devoted to Anesthesia and related topics from any country of the world.

Journal of Surgery and Anesthesia provides information on surgical sciences and practices and addresses all aspects of surgery & anesthesia practice, including anesthetic administration, pharmacokinetics, preoperative and postoperative considerations, coexisting disease and other complicating factors, General Surgery, Robotic Surgery, Orthopedic Surgery, GI Surgery, Neurosurgery, Plastic Surgery, Cardiothoracic Surgery, Vascular Surgery, Urology, Surgical Oncology, Radiology, Ophthalmology, Pediatric Surgery, Trauma Services, Minimal Access Surgery, Endocrine Surgery, Colorectal Surgery, Laparoscopic and Endoscopic Techniques and Procedures, Preoperative and Postoperative Patient Management, Complications in Surgery and New Developments in Instrumentation and technology related to surgery, Intra-Operative Regional Anesthesia Administration Techniques, Peri-Operative Pain, Obstetric Anesthesia, Pediatric Anesthesia, General Anesthesia, Sedation, Regional Anesthesia, Outcome Studies and Associated Complications, etc.

Average publishing costs per article vary substantially depending on a range of factors including rejection rate (which drives peer review costs), range and type of content, levels of editorial services, and others. With the help of our editors and peer reviewers, we published five quality articles [1-5].

Social networks and other social media have yet to make the impact on scholarly communication the rapid general adoption of mobile devices (smartphones and tablets) has yet to change significantly the way most researchers interact with most journal content—accesses from mobile device Uptake for professional purposes has been fastest among physicians and other healthcare professionals.

Our editors and Editorial Board Members have worked hard to meet our goals of delivering timely decisions and maintaining communication with our authors throughout the editorial and review process.

But we wouldn't be anywhere today without our authors, reviewers, and readers. We have had the privilege to publish truly outstanding, high-quality papers that, judging by the response of our reviewers and readers, are important contributions to their respective fields of research. We want to take this moment to thank all of our authors for entrusting us with their discoveries.
