HERBAL MEDICINE

Products which are made from plants that and used to treat diseases and maintain health are called herbal products or biomedicine. Herbal supplements are available all forms: dried, chopped, powdered, capsule, or liquid, and may be utilized in various ways, including:

• Swalloed as liqid, pill and powder
• Brewed as tea
• Applied to the skin as gels, lotions, or creams

Herbal medicine is that the use of plants to treat disease and enhance general health and wellbeing. Herbs can interact with other pharmaceutical medications and will be crazy care. Always see your regular medical doctor (GP) about any health concerns and tell them about any herbal medicines you're taking or thinking of taking. Never stop taking prescribed medications in favor of herbs without first discussing it with your GP. Be careful about purchasing herbal medicines over the web. Unregulated herbal medicines, such as some traditional folk medicines, may not be manufactured to the same quality and standard as regulated medicines.

COMMON HERBAL MEDICINE

Chamomile
Chamomile is commonly used for depression, anxiety. It is also used in wound healing, swelling, inflammation and redness. It can also use as tea. It is also helpful in treating skin treatment caused by radiation therapy. It is also used as capsule to control vomiting during chemotherapy.

Echinacea
It is a amazing herbal medicine commonly used to treat cold, infection and would heal. It is also helpful in treating upper respiratory infection. Short term use of Chamomile is effective but longterm use can...
defect the immune system.
People who are allergic to plants in the daisy family may be more likely to have an allergic reaction to Echinacea.

Feverfew
It is a famous herbal medicine mostly used to treat fever but now it is using to prevent migraines and treat arthritis.
If the leaves are chewed mouth ulcer can happen. People who are taking Feverfew I a regular basis they may be severe headache.
It can also be used as anticoagulant to clot the blood.
Garlic is a famous cooking ingredient which has been used all over the world and it had many medicinal properties.
Garlic has antimicrobial, cardioprotective, anticancer and anti-inflammatory properties.
It also helps lower cholesterol and blood pressure.
Large amount of garlic should not take before dental procedure or surgery because it may cause harm to health.

Ginger
Ginger is a god herb for treating nausea and motion sickness.
Nausea caused by different reasons can be cured by eating ginger. It is a anti-inflammatory and antioxidant product.
Drawbacks of ginger are excessive use of ginger may lead to gas, heartburn, acidity and nausea in some people.

Ginkgo
Ginkgo is an effective herbal medicine which is used to treat a variety of conditions such as asthma, bronchitis, fatigue, and tinnitus.
It is also used to treat certain neurological disorder such as dementia, chemical imbalance in brain etc.
Often it is also used to increase the memory.
Only gingko leaves can be used as a medicine, its seed contains toxins.
This toxin can cause seizures and, in large amounts, death.
Ginkgo can increase the risk of bleeding, it should not be used with nonsteroidal anti-inflammatory medicines, anticoagulants, anticonvulsant medicines, or tricyclic antidepressants.
