effect on the health of a community. it's owing to public health that we tend to perceive that second-hand smoke will cause cancer, that bicycle helmets will save lives, which unclean water will carry disease-causing bacterium.

The overall health of a community is littered with social, cultural and economic factors. Health consultants explore all aspects of people's lives so as to totally expose and gauge the multitude of problems that impact community eudaimonia. Public health practitioner's area unit particularly qualified as policy advocates and to market behavioural amendment and eudaimonia practices. Whereas medical practitioners have an interest within the health of individual patients, public health practitioners have an interest within the health of the community as an entire. As former sawbones General C. Everett Koop wrote.

**Global health** care sector issues in 2019

Creating financial sustainability in an uncertain health economy

Global health care expenditures are expected to continue to rise as spending is projected to increase at an annual rate of 5.4 percent between 2017-2022, from USD $7.724 trillion to USD $10.059 trillion. The emergence of personalized medicine, increased use of exponential technologies, and entry of disruptive and non-traditional competitors, the demand for expanded care delivery sites, and revamped payment and public funding models are all impacting the financial performance of the health care ecosystem. The health care market is looking to health technology for help, along with mergers, acquisitions, and partnerships. Stakeholders are also exploring alternative revenue sources such as vertical integration. Will approaches to well-being hold financial answers for the future?
