workforce.

The global healthcare industry is expected to grow from \$99.6 billion in 2010 to \$162.2 billion in 2015, at a CGAR of 10.2% from 2010-2015.

Increasing cases of chronic diseases coupled with the rise in the geriatric population are anticipated to fuel the market growth. According to an article by the United Nations in 2017, the elderly population accounted for nearly 13% of the global population and is anticipated to increase by 3% annually. Furthermore, senior individuals are prone to chronic diseases and need more healthcare services, which are anticipated to drive the market. Rising workforce pertaining to home healthcare service translates the increasing demand. As per the statistics published by the U.S. Bureau of Labor Statistics, the ranks of personal care and, home care aides are anticipated to reach 13.0 million by 2020, which translates to approximately 70.0% rise from 2010.
