### EDITORIAL

I am gratified to introduce Journal of Family Medicine & Medical Science Research which has experienced a substantial increase in the number of page views and indirectly of research articles over the past one year submitted, though number of rejections in the preliminary screening due to plagiarism or being out of the format was also there. The recent Volume 8 (2019) was published well within the time line and the print issues were also brought out and dispatched within 30 days of publishing the issue online. The journal covered a broad spectrum of clinical topics and articles accepted in terms of academic needs to family physicians, urban GPs, rural physicians, NRHM doctors, community surgeons, community doctors, providers of Maternal health & Child care, emergency physicians, occupational physicians and public health specialists and in medical sciences as well.

The journal published all original article on clinical studies, theories and policies related the tutorial discipline of family medicine and Medical Science Research. I encourage studies administered in medical care and family practice found out also as community level studies. This year 2020, in order to enhance the page views and receiving and to make more family medicine research available and advertise, twitter was introduced as a social networking means which has connected to a number of distinguished and renowned expertise in recent researches. It was found to be vast medium between the recognized analysts and their key knowledge on the specific research. Family Medicine and Medical Science Research also instigated digital advertising to assist customers with educating

and pull in new clients rapidly and proficiently. From 2020 we enhanced our advertising options, included banners, sponsored emails, article alerts or newsletters, provide clients with the very best customized marketing opportunities in science and medicine.

FMMSR during this year also brought out a supplement and a number of conferences editorials to Jan-Feb 2019 issue, which consisted of 51 abstracts of an International conference on family medicine and healthcare. The FMMSR Impact factor for the year 2018 was 0.78, while the current ICV (Index Copernicus Value) Value was increased to 72.76 for the year 2019. During the calendar year 2019, FMMSR received a good number of articles. Journal of family medicine and medical science research seeks to foster academic communication and interdisciplinary research among medical care providers to be engaged in various forms. We keep up high caliber and moral norms of publishing industry, which makes us extraordinary and superior to the rest.

At last I take this opportunity to acknowledge the contribution of Reviewer during the final editing of articles published and the support rendered by the editorial assistant, in bringing out issues of FMMSR in time. I would also like to express my gratitude to all the authors, reviewers, the publisher, the advisory and the editorial board Member (Prof. Ghanshyambhai T Savani and Prof. Kimberly B. Heidal) of FMMSR, the office bearers for their support in bringing out another volume of FMMSR and look forward to their continuous and implacable support to help to draw out the Volume 9 of FMMSR too in planned time.
