- 1) Focusing on People: First we need to get who is our frequent visiting audience.
- 2) Choosing correct platform to post sometimes we cannot post everything in some social media platforms like in linkedin we will be having limited access to post but in linkedin we can get good scholar researchers. So, we need to select few social media platforms based on post requirement.

We should also post about our editors and authors to boost up their confidence and it brings more positivity towards our journal. If we can follow these few procedures to use social media, it would be grateful to journal.
