

Advances in Clinical & Cellular Immunology

Abdhul Rehman Asif*

Department of Central Laboratory, Georg-August-University, Göttingen, Germany

EDITORIAL

Journal of Clinical & Cellular Immunology is an open access journal which is an essential reading for scholars in all areas of immunological studies. The journal publishes papers describing original work in all areas of immunology including immunochemistry, imaging, cellular and molecular immunology, mathematical modelling, immunogenetics, transplantation immunology, allergy, clinical immunology and immunological therapies, cancer immunology, physiological functioning of the immune system in states of both health and disease, malfunctions of the immune system in immunological disorders and therapies (hypersensitivities, autoimmune diseases, transplant rejection, immune deficiency), the chemical, physical and physiological characteristics of the components of the immune system in vivo, in situ, and in vitro, are of prime interest.

JCCI ensures the faster publication of high quality articles with the support of its eminent 100+ Editorial board members. Two independent review comments followed by editor's decision will be considered to publish the article. It encourages authors to publish their theoretical and experimental results in as much detail as possible.

This Science Journal publishes research articles, case studies, reviews, commentaries, short communications, and letters to the editor on various aspects of Cellular and Clinical Immunology making them freely available worldwide with 25+ million reader database. To attain high impact factor, quality articles are expected from all over the world for this peer reviewed and open access front running journal.

For quality in review process Journal of Clinical & Cellular Immunology (JCCI) is using Editorial submission and tracking System. Editorial submission and tracking System is an online manuscript submission, review and tracking systems used by most of the best open access journals. Review processing is performed by the editorial board members of JCCI or outside experts; at least two independent reviewers approval followed by

editor's approval is required for acceptance of any citable manuscript.

In accordance with typical definitions of open access in scientific literatures, JCCI defines and firms the open access by the below appended norms. The galley proof is sent to the author for final confirmation of error free publication before publication,

From the start journal aims to publish articles under the norms of Creative Common Attribution License. This encloses that all academic articles published in JCCI can be taken from screened by search engines, external sources, blogs, acquired by applications or websites, etc. free of charge under the solitary condition of proper endorsement of the source and inventive publisher. JCCI trusts that open-access publishing adopts the alteration of research results amongst scientists, thus facilitating interdisciplinary research. Open access publishing also provides access to researchers wide-reaching, including those from developed countries, and to an interested broad-spectrum community.

Moreover, we would like to thank our readers for their support. We are having more than 3500 readers globally and this will be only possible with open access journals. Our journal provides its google analytics report and the visitor's traffic is the benchmark for the success of any scientific journal and the Journal of Clinical and Cellular Immunology is constantly attracting viewers across the world. Readers from the major countries including China, United States, Japan, United Kingdom, India, Italy and Nigeria visit our journal domain to learn about the ongoing research activities in this field. For its upcoming volume of JCCI, we will be providing the same features just like 2019 and with the authors support and reviewers work we will go further with 6 issues per year and with more assistance from Editorial team we will try coin special issue related to the topic of our journal. With more furtherance from authors through their qualitative research work our journal will reach greater heights and we always encourage the publication of qualitative research works.
