

## New Frontiers and Innovations in Stem Cells and Biomaterials

Annett Dorner-Reisel

Stem Cells and Biomaterials is a collaborative field that applies the standards of designing and life sciences toward the advancement of natural substitutes that re-establish, keep up, or enhance tissue work or an entire organ. The Stem Cells and Biomaterials conferences of the ConferenceSeries serve as a platform to bring together all the researchers working in the field to develop the novel trends for global strategic development.

The major focus on 15th Annual Conference on Stem Cells and Biomaterials. This is scheduled during April 19-20, 2021 at Madrid | Spain. This conference primarily focussed on important topics such as, Tissue Engineering, Regenerative Medicine, Bio Materials, Scaffolds, Stem Cell and Regenerative Medicine, Bio Medicine, Cell and Gene Therapy, Cancer Stem Cells, Bio Medical Engineering, Regenerative Rehabilitation, Anti-Aging Medicine, 3D Bio Printing and Bio Fabrication, Applications of Tissue Engineering.

Global market for Stem Cell and Biomaterials, estimated at US\$23 billion in 2015, forecast to reach US\$27.3 billion in 2015, and is further expected to register a CAGR of about 23% between 2016 and 2022 to touch a projected US\$94.2 billion by 2022. The contribution of the European region was 43.3% of the market in 2010, a value of \$24.2 billion. The market is expected to reach \$25.5 billion by 2011 and will further grow to \$36.1 billion by 2016 at a CAGR of 7.2%. It grows to \$65 billion to 2024.

The ConferenceSeries Stem Cells and Biomaterials conferences embrace research scholars, Academic professors, and surgeons who endeavour to disseminate their research

experience to escalate the forthcoming research ideas. Conference Series LLC LTD is an open resource platform that conducts 3000+ global events including International Conferences, Workshops, Symposia, Trade Shows, Exhibitions and Science Congresses in all the major scientific disciplines, including Clinical, Medical, and pharmaceutical, Engineering, Technology, Business Management and Life Sciences across America, Europe, The Middle East, and Asia Pacific.

EURO BIOMATERIALS 2019 hosted by Conference series LLC Ltd during April 25-27, 2019 at Amsterdam, Netherlands with a theme “New Frontiers and Innovations in Stem Cells and Biomaterials”, was a great success where eminent Keynote Speakers from various reputed institutions with their presence addressed the gathering to strengthen the future of Stem Cells and Biomaterials. The conference proceedings were carried out through various Scientific-sessions and plenary lectures, of which the following Speakers were highlighted as Keynote Speakers who participated avidly and effectively.

Ken Yaegaki, Nippon Dental University School of Life Dentistry, Japan; Xiao Dong Chen, University of Texas Health Science Center, USA; Shaik O. Rahaman, University of Maryland, USA; Peter A. Everts, Gulf Coast Biologics, USA; Takashi Tsuji, RIKEN Center for Bio systems Dynamics Research, Japan; Pradeep Srivastava, School of Biochemical Engineering, Indian Institute of Technology BHU, Varanasi, India.
