SHORT COMMUNICATION

Pollution is a term which even kids are conscious of lately. It's become so common that nearly everyone acknowledges the very fact that pollution is rising continuously. The term 'pollution' means the manifestation of any unsolicited foreign substance in something. once we mention pollution on earth, we ask the contamination that's happening of the natural resources by various pollutants. All this is often mainly caused by human activities which harm the environment in ways quite one. Therefore, an urgent need has arisen to tackle this issue straightaway. that's to mention, pollution is damaging our earth severely and that we got to realize its effects and stop this damage. during this essay on pollution, we'll see what the consequences of pollution and the way are to scale back it.

Effects of Pollution

Pollution affects the standard of life quite one can imagine. It works in mysterious ways, sometimes which can't be seen by the eye. However, it's considerably presents within the environment. as an example, you would possibly not be ready to see the natural gases present within the air, but they're still there. Similarly, the pollutants which are messing up the air and increasing the amount of CO₂ is extremely dangerous for humans. Increased level of CO₂ will cause heating.

Further, the water is polluted within the name of commercial development, religious practices and more will cause a shortage of beverage. Without water, human life isn't possible. Moreover, the way waste is dumped on the land eventually finishes up within the

soil and turns toxic. If land pollution keeps on happening at this rate, we won't have fertile soil to grow our crops on. Therefore, serious measures must be taken to scale back pollution to the core.

How to Reduce Pollution?

After learning the harmful effects of pollution, one must get on the task of preventing or reducing pollution as soon as possible. to scale back pollution, people should take conveyance or carpool to scale back vehicular smoke. While it's going to be hard, avoiding firecrackers at festivals and celebrations also can hamper on air and sound pollution. Above all, we must adopt the habit of recycling. All the used plastic finishes up within the oceans and land, which pollutes them.

So, remember to not eliminate them off after use, rather reuse them as long as you'll. We must also encourage everyone to plant more trees which can absorb the harmful gases and make the air filter. When talking on a much bigger level, the govt must limit the usage of fertilizers to take care of the soil's fertility. additionally, industries must be banned from dumping their waste into oceans and rivers, causing pollution.

To sum it up, all kinds of pollution is hazardous and comes with grave consequences. Everyone must take a step towards change starting from individuals to the industries. As tackling this problem involves a joint effort, so we must join hands now. Moreover, the innocent lives of animals are being lost due to such human activities. So, all folks must take a stand and become a voice for the unheard so as to form this earth pollution-free.
