

## Scope of Journal of Medical and Surgical Pathology

Lance Buckthought\*

Bachelor of Medicine and Bachelor of Surgery, Wellington Hospital, Riddiford St, Wellington, New Zealand

### ABSTRACT

Journal of Medical & Surgical Pathology in short JMSP is a peer-reviewed, open-access scientific journal concerned with research on numerous aspects. Surgical specimens are of two categories, biopsies, and surgical resections. Surgical pathology also includes subdivisions such as dermatopathology, cytopathology, hematopathology, neuropathology and pediatric pathology.

Keywords: Hematopathology; Cytopathology; Neuropathology

### INTRODUCTION

Journal of Medical & Surgical Pathology in short JMSP is a peer-reviewed, open-access scientific journal concerned with research on numerous aspects. Surgical specimens are of two categories, biopsies, and surgical resections. Surgical pathology also includes subdivisions such as dermatopathology, cytopathology, hematopathology, neuropathology and pediatric pathology.

The emphasis of medical and surgical pathology is on study of macroscopic and histologic specimens and biopsies. Also welcome are papers on immunohistochemistry, cytopathology methods, molecular diagnostics such as DNA / RNA research to identify infectious agents and review of innovative surgical procedures. The publisher of JMSP is Longdom.

Longdom Publishing SL assemble more than 1000 conferences annually across the USA, Europe & Asia with the sponsorship of more than 1000 academic societies and publishes more than 700 open access publications featuring more than 50000 eminent figures, prominent scientists as members of the editorial board.

#### Types of research work

JMSP accept Research, original articles, review articles, short review, case reports, case studies, case series, short communications, hypothesis, etc. type of articles in field of Medical and Surgical Pathology. Medical & Surgical Pathology Journal uses editorial manager system for peer review process quality. It is a system used by most of the best open access journals to submit, review and manage manuscripts online.

Review processing is carried out by editorial board members or external experts. JMSP has gaining more readers and citations.

This journal provides an open access forum for authors to report their research results and thus assist in supporting fieldwork.

#### Journal Highlights

JMSP shows many highlights like Anatomy Pathology, Cancer Pathology, Digital Pathology, Forensic Pathology, Medical Pathology, Speech Language Pathology, Surgical pathology, Telepathology, Tumor Pathology, etc.

#### Anatomy Pathology

Anatomical Pathology is the process of observing the organs and tissues to help in the knowledge of the reasons and effects of specific diseases.

#### Cancer Pathology

Cancer pathology is a diverse and innovative pathology field which focuses on studying, examining, and diagnosing cell-causing cancer.

#### Medical Pathology

Medical pathology is a branch of medical science that deals primarily with examining organs, tissues, etc.

### **Surgical Pathology**

Surgical pathology is the study of removing tissues from living patients during surgery to help them out from disease infections and to determine patient treatment plans.

### **Telepathology**

Telepathology is the pathology practice that is done from a distance.

### **Tumor Pathology**

Tumor pathology is the area of pathology to be studied and to observe the causing reasons for converting cancer cells into tumors.

### **Upcoming Conferences**

JMSP going to assemble International conference on Fungal Infections and Treatment scheduled during Nov 25-26, 2020 in New York, USA. Conference will be focusing on the theme "Current Advancement on Fungal infections and Care" to enhance and explore knowledge among academicians and industry personnel.

### **Conclusion**

We adopt a number of tactics to support our journal which we choose as the best medium to reveal our work. Twitter and LinkedIn are mainly used to share journal excerpts, and even to submit manuscripts.
